

Terms & Conditions

Last Updated: 15 September 2026

Welcome to **ANTELLAY Space**, a space-technology initiative operated by **ANTELLAY Labs**. These Terms & Conditions (“Terms”) govern your access to and use of the ANTELLAY Space website, platform, applications, data interfaces, visualizations, and related services (collectively, the “Platform”).

By accessing or using the Platform, you agree to be bound by these Terms. If you do not agree with these Terms, please do not use the Platform.

1. About ANTELLAY Space

ANTELLAY Space is a technology initiative focused on developing artificial intelligence, data, analytics, simulation, monitoring, and software infrastructure for the space economy.

Our Platform may provide access to satellite, orbital, Earth observation, space-weather, telemetry, geospatial, and other space-related information obtained from publicly available sources, third-party providers, APIs, datasets, or other authorized sources.

ANTELLAY Space does not necessarily own, operate, control, or maintain the satellites, spacecraft, sensors, ground stations, or external infrastructure from which such information may originate.

2. Use of the Platform

You may use the Platform for lawful purposes, including:

- Exploring space and satellite-related information.
- Viewing orbital and other publicly available space data.
- Research, education, analysis, and technology exploration.
- Evaluating ANTELLAY Space's products and future capabilities.
- Using available software features and visualizations in accordance with these Terms.

You agree not to:

- Use the Platform for unlawful activities.
- Attempt to gain unauthorized access to the Platform or its infrastructure.
- Interfere with the operation or security of the Platform.
- Scrape, overload, reverse engineer, or disrupt the Platform without authorization.
- Use the Platform to develop or facilitate malicious activities.

- Misrepresent ANTELLAY Space data, technology, affiliation, or capabilities.

3. Satellite and Orbital Data

ANTELLAY Space may display or process data relating to satellites, spacecraft, orbital positions, space objects, Earth observation, space weather, or related information.

Such data may be obtained from third-party or publicly available sources and may be subject to:

- Delays;
- Updates or revisions;
- Incomplete information;
- Temporary unavailability;
- Measurement or calculation errors;
- Differences between data providers; or
- Technical limitations of external APIs and infrastructure.

The availability of a satellite, spacecraft, object, or orbital information on the Platform does not mean that ANTELLAY Space owns, operates, controls, or has direct communication with that satellite or spacecraft.

4. Accuracy of Information

We make reasonable efforts to provide useful and reliable information. However, ANTELLAY Space does not guarantee that all information available through the Platform will always be accurate, complete, current, uninterrupted, or error-free.

Real-time or near-real-time information may change without notice.

You should independently verify critical information before relying on it for any operational, commercial, scientific, safety-related, regulatory, or other high-impact purpose.

5. AI, Analytics and SpaceOS

ANTELLAY Space may use artificial intelligence, machine learning, simulations, algorithms, predictive models, and automated analytics as part of its Platform and future products, including technologies referred to as **SpaceOS**.

AI-generated or algorithmically generated outputs are provided for informational and analytical purposes unless expressly stated otherwise.

Such outputs may contain inaccuracies, assumptions, predictions, or errors. They should not be treated as a substitute for professional human judgment, mission-control procedures, engineering validation, regulatory requirements, or independently verified scientific information.

ANTELLAY Space does not guarantee that any prediction, recommendation, simulation, classification, or AI-generated output will be correct or suitable for a particular mission or application.

6. No Mission-Critical Guarantee

Unless expressly agreed under a separate written contract, the Platform is not warranted or represented as a certified mission-critical, safety-critical, navigation-critical, defense-critical, aviation-critical, or emergency-response system.

You should not rely solely on the Platform for decisions where failure, delay, or inaccurate information could result in injury, loss of life, property damage, financial loss, or other significant consequences.

7. Third-Party Services and Data

The Platform may depend on third-party APIs, data providers, cloud infrastructure, datasets, maps, satellite catalogs, hosting services, analytics services, or other external technologies.

ANTELLAY Space is not responsible for interruptions, changes, inaccuracies, restrictions, pricing changes, or discontinuation of third-party services.

Third-party services may have their own terms, licenses, privacy policies, and usage restrictions. Your use of such services may be subject to those additional terms.

8. Intellectual Property

Unless otherwise stated, the ANTELLAY Space name, branding, website design, software, interfaces, graphics, text, original content, concepts, architecture, documentation, and other materials provided by ANTELLAY Space are owned by or licensed to ANTELLAY Labs and are protected by applicable intellectual-property laws.

You may not reproduce, modify, distribute, sell, publicly display, commercially exploit, or create derivative works from ANTELLAY Space proprietary materials without prior written permission.

Third-party data, satellite information, imagery, datasets, logos, trademarks, and other materials remain the property of their respective owners and may be subject to separate licenses.

9. User Content and Submissions

If you voluntarily submit information, ideas, feedback, technical suggestions, questions, or other content to ANTELLAY Space, you represent that you have the right to provide such content.

By submitting feedback or suggestions, you grant ANTELLAY Space permission to use such feedback for improving, developing, or evaluating its products and services, unless otherwise agreed in writing.

You should not submit confidential, classified, proprietary, or sensitive information through publicly accessible areas of the Platform.

10. Security

We take reasonable measures to protect the Platform and its infrastructure. However, no internet-based system can be guaranteed to be completely secure.

You agree not to attempt to bypass security controls, access restricted systems, introduce malicious code, conduct unauthorized penetration testing, or otherwise interfere with the security of the Platform without prior written authorization.

11. Availability and Changes

ANTELLAY Space may modify, update, suspend, restrict, or discontinue any part of the Platform or its features at any time.

We may also add new products, technologies, data sources, AI capabilities, APIs, simulations, or other functionality in the future.

Information describing future products, capabilities, roadmaps, or planned technologies represents our current direction and may change without notice. Such statements should not automatically be interpreted as a guarantee that a particular product or capability will be launched.

12. Investment and Financial Disclaimer

Nothing on the ANTELLAY Space website constitutes an offer, solicitation, recommendation, or invitation to purchase securities or make an investment.

Any information regarding funding, partnerships, business plans, market opportunities, future products, growth plans, or commercial opportunities is provided for general informational purposes only.

Any investment or commercial transaction with ANTELLAY Labs or an associated entity will be subject to separate documentation and applicable laws.

13. External Links

The Platform may contain links to third-party websites, services, documentation, data sources, or platforms.

Such links are provided for convenience and do not necessarily constitute an endorsement or guarantee by ANTELLAY Space.

We are not responsible for the content, availability, security, privacy practices, or policies of third-party websites.

14. Disclaimer of Warranties

To the maximum extent permitted by applicable law, the Platform and its content are provided on an “as is” and “as available” basis.

ANTELLAY Space does not guarantee that:

- The Platform will always be available;
- Data will always be accurate or current;
- Services will operate without interruption;
- Third-party data sources will remain available;
- AI or analytical outputs will always be correct;
- Errors will always be identified or corrected; or
- The Platform will satisfy every user's particular requirements.

15. Limitation of Liability

To the maximum extent permitted by applicable law, ANTELLAY Labs, ANTELLAY Space, and their respective team members, partners, contractors, and service providers will not be liable for indirect, incidental, consequential, special, exemplary, or punitive damages arising from or related to your use of, or inability to use, the Platform.

This includes, where legally permitted, losses resulting from reliance on satellite data, orbital information, AI-generated outputs, predictions, simulations, third-party information, service interruptions, or technical errors.

Nothing in these Terms excludes or limits liability that cannot legally be excluded or limited under applicable law.

16. Indemnification

You agree to indemnify and hold harmless ANTELLAY Labs, ANTELLAY Space, and their respective directors, employees, contractors, partners, and service providers from claims, liabilities, damages, losses, and expenses arising from:

- Your unlawful or unauthorized use of the Platform;
- Your violation of these Terms;
- Your violation of third-party rights; or
- Your misuse of Platform data or technology.

17. Privacy

Your use of the Platform may also be governed by our **Privacy Policy**, which explains how information may be collected, used, stored, and processed.

By using the Platform, you acknowledge that you have had the opportunity to review the applicable privacy information.

18. Cookies and Similar Technologies

The Platform may use cookies, analytics tools, or similar technologies to maintain functionality, understand website usage, improve user experience, and support security.

Where required by applicable law, appropriate consent mechanisms may be provided.

19. Regulatory Compliance

You are responsible for ensuring that your use of ANTELLAY Space technology, data, software, and information complies with all laws and regulations applicable to you.

This may include laws relating to space activities, telecommunications, remote sensing, geospatial data, cybersecurity, export controls, sanctions, data protection, and other applicable regulatory requirements.

ANTELLAY Space does not provide legal or regulatory advice through the Platform.

20. Termination

We may restrict or terminate access to the Platform where we reasonably believe that a user has violated these Terms, attempted to compromise the Platform, engaged in unlawful activity, or otherwise created a security, legal, or operational risk.

You may stop using the Platform at any time.

21. Changes to These Terms

We may update these Terms from time to time to reflect changes in our technology, services, legal requirements, or business operations.

The updated version will be posted on this page with a revised “Last Updated” date.

Your continued use of the Platform after changes are posted constitutes acceptance of the updated Terms, to the extent permitted by applicable law.

22. Governing Law

These Terms shall be governed by and interpreted in accordance with the laws of **India**, without regard to conflict-of-law principles.

Subject to applicable law, courts having jurisdiction in **Jaipur, Rajasthan, India** shall have jurisdiction over disputes arising in connection with these Terms or your use of the Platform.

23. Severability

If any provision of these Terms is determined to be invalid, unlawful, or unenforceable, that provision shall be interpreted or modified to the minimum extent necessary, and the remaining provisions shall continue in full force and effect.

24. Entire Agreement

These Terms, together with any applicable Privacy Policy and other policies or agreements expressly incorporated by reference, constitute the understanding governing your use of the Platform.

25. Contact Us

For questions, legal notices, or other inquiries regarding these Terms, please contact:

Privacy Policy

Last Updated: 15 September 2026

ANTELLAY Space, operated by **ANTELLAY Labs** (“ANTELLAY Space”, “ANTELLAY”, “we”, “us”, or “our”), respects your privacy and is committed to protecting information that may be collected when you visit or interact with our website, platform, products, and services.

This Privacy Policy explains what information we may collect, how we use it, how we protect it, and the choices available to you.

By using the ANTELLAY Space website or related services, you acknowledge this Privacy Policy.

1. About ANTELLAY Space

ANTELLAY Space is a technology initiative focused on artificial intelligence, satellite and orbital data, space analytics, simulation, monitoring, software infrastructure, and technologies for the space economy.

Our website may provide access to satellite, orbital, Earth observation, space-weather, geospatial, and other space-related information.

This Privacy Policy applies to information collected through our website, forms, communications, and other services that expressly link to this Policy.

2. Information We May Collect

Depending on how you interact with ANTELLAY Space, we may collect the following categories of information.

2.1 Information You Provide

You may voluntarily provide information when you:

- Contact us;
- Submit an inquiry;
- Request information;
- Subscribe to communications;
- Submit partnership or business inquiries;
- Apply for opportunities;
- Submit feedback;
- Participate in surveys or forms; or

- Communicate with our team.

This information may include:

- Name;
- Email address;
- Phone number;
- Company or organization name;
- Job title;
- Information contained in your message;
- Professional information; and
- Other information you voluntarily choose to provide.

Please do not submit classified, confidential, sensitive, or proprietary information through publicly accessible forms unless specifically requested through an appropriate secure channel.

3. Automatically Collected Information

When you access our website, certain technical information may be collected automatically by our hosting, security, analytics, or other technology providers.

This may include:

- IP address;
- Browser type;
- Device type;
- Operating system;
- Approximate geographic information derived from technical data;
- Referring website;
- Pages visited;
- Date and time of access;
- Time spent on pages;
- Website interaction information;
- Error and diagnostic information; and
- Other technical information necessary for security and operation.

We may use this information to operate, secure, maintain, and improve the website.

4. Cookies and Similar Technologies

ANTELLAY Space may use cookies, pixels, local storage, analytics technologies, and similar mechanisms.

These technologies may be used for purposes such as:

- Website functionality;
- Security;
- Remembering preferences;
- Understanding website traffic;
- Measuring performance;
- Improving user experience; and
- Detecting technical problems or abuse.

You may be able to control cookies through your browser or device settings.

Some website functionality may not work properly if certain cookies or technologies are disabled.

5. How We Use Information

We may use collected information to:

- Operate and maintain the website;
- Respond to inquiries;
- Communicate with users;
- Provide requested information or services;
- Improve our website and technology;
- Understand website usage;
- Monitor security and prevent abuse;
- Detect and troubleshoot technical problems;
- Develop and evaluate products and services;
- Manage partnerships and business communications;
- Comply with applicable legal obligations; and
- Protect our rights, users, systems, and property.

We will use information for purposes reasonably connected to the interaction through which it was provided, subject to applicable law.

6. Satellite and Space Data

ANTELLAY Space may display or process satellite, orbital, Earth observation, space-weather, geospatial, or related data obtained from public sources, third-party providers, APIs, or other authorized sources.

Such space-related data generally does **not** constitute personal information merely because it is displayed on our Platform.

ANTELLAY Space does not claim ownership of third-party satellite datasets or information where such ownership belongs to another organization.

Third-party data may be governed by separate licenses, terms, or privacy policies.

7. Information From Third Parties

We may receive information from third-party services or technology providers that support our website or operations.

These may include:

- Hosting providers;
- Cloud infrastructure providers;
- Analytics providers;
- Security providers;
- Communication providers;
- Form and customer-management systems;
- API providers; and
- Other technology or business service providers.

The information received from such providers may be subject to their own policies and applicable contractual or legal requirements.

8. How We Share Information

We do not intend to sell personal information as a business model.

We may share information where reasonably necessary with:

- Technology and hosting providers;
- Security and infrastructure providers;
- Analytics and communications providers;
- Professional advisers;
- Contractors or service providers working on our behalf;
- Business partners where necessary for a requested service or collaboration;
- Government authorities or regulators where legally required; or
- Other parties where you have provided appropriate permission.

We may also disclose information when reasonably necessary to protect our legal rights, security, users, systems, or property.

9. International Data Transfers

Some technology and service providers used by ANTELLAY Space may process information in countries outside India.

Where personal information is transferred internationally, we will take reasonable steps to handle such information in accordance with applicable data-protection requirements.

10. Data Security

We use reasonable administrative, technical, and organizational measures designed to protect information against unauthorized access, alteration, disclosure, misuse, or destruction.

However, no website, internet transmission, cloud infrastructure, or electronic storage system can be guaranteed to be completely secure.

You acknowledge that transmission of information over the internet carries inherent security risks.

11. Data Retention

We retain information only for as long as reasonably necessary for the purposes described in this Privacy Policy, to provide services, maintain business records, resolve disputes, enforce agreements, meet legal obligations, or protect our legitimate interests.

Retention periods may vary depending on the type and purpose of the information.

When information is no longer reasonably required, it may be deleted, anonymized, or securely disposed of, subject to applicable legal requirements.

12. Your Choices and Rights

Depending on applicable law, you may have rights relating to your personal information, which may include:

- Requesting access to certain personal information;
- Requesting correction of inaccurate information;
- Requesting deletion where legally applicable;
- Withdrawing consent where processing is based on consent;
- Objecting to certain processing;
- Requesting information about how your data is processed; and
- Raising a privacy-related complaint.

Requests may be subject to identity verification and applicable legal limitations.

To exercise an applicable privacy right, contact us using the details provided below.

13. Children's Privacy

Our website is not intentionally designed to collect personal information from children.

If you believe that a child has provided personal information to us without appropriate authorization, please contact us so that we can review and take appropriate action.

14. Third-Party Websites

Our website may contain links to external websites, services, documentation, datasets, APIs, or other platforms.

We do not control the privacy practices of third-party websites.

We encourage users to review the privacy policies of third-party services before providing personal information to them.

15. Business Transfers

If ANTELLAY Labs or ANTELLAY Space is involved in a merger, acquisition, restructuring, financing, sale of assets, or similar transaction, information associated with the relevant business may be transferred as part of that transaction, subject to applicable law.

16. Legal and Regulatory Compliance

We may process or disclose information where reasonably necessary to:

- Comply with applicable laws;
- Respond to lawful requests from authorities;
- Protect the security of our systems;
- Investigate suspected misuse or unlawful activity;
- Enforce our Terms & Conditions; or
- Protect the rights, property, or safety of ANTELLAY Space, ANTELLAY Labs, users, or other parties.

17. Changes to This Privacy Policy

We may update this Privacy Policy periodically to reflect changes in our technology, services, legal requirements, or business operations.

When changes are made, the “**Last Updated**” date at the top of this page will be updated.

We encourage you to review this page periodically.

18. Contact Us

Cookie Policy

Last Updated: 15 September 2026

This Cookie Policy explains how **ANTELLAY Space**, operated by **ANTELLAY Labs** (“ANTELLAY Space”, “ANTELLAY”, “we”, “us”, or “our”), may use cookies and similar technologies when you visit or interact with our website and related online services.

This Policy should be read together with our **Privacy Policy** and **Terms & Conditions**.

1. What Are Cookies?

Cookies are small text files that may be stored on your computer, mobile device, or other device when you visit a website.

Cookies allow websites to recognize a device, remember certain preferences, maintain functionality, and understand how visitors interact with a website.

We may also use technologies similar to cookies, including pixels, local storage, tags, scripts, and analytics identifiers.

2. Why ANTELLAY Space Uses Cookies

We may use cookies and similar technologies for several purposes, including:

- Operating the website;
- Maintaining website functionality;
- Improving website performance;
- Remembering user preferences;
- Understanding website traffic;
- Measuring engagement;
- Detecting errors;
- Protecting the website from abuse;
- Improving user experience; and
- Understanding how our services are used.

3. Types of Cookies We May Use

3.1 Strictly Necessary Cookies

These cookies may be required for essential website functionality.

They can support functions such as:

- Security;
- Session management;
- Basic navigation;
- Form functionality;
- Load balancing; and
- Other essential technical operations.

These cookies generally cannot be disabled through our website without potentially affecting functionality.

3.2 Functional Cookies

Functional cookies may help remember preferences and settings so that the website can provide a more consistent experience.

Examples may include:

- Language preferences;
- Interface preferences;
- Session preferences; and
- Other user-selected settings.

3.3 Analytics Cookies

We may use analytics technologies to understand how visitors use our website.

Analytics information may include:

- Pages viewed;
- Approximate visit duration;
- Traffic sources;
- Device and browser information;
- General interaction patterns; and
- Technical performance information.

Analytics helps us understand which parts of the website are useful and where improvements may be required.

3.4 Performance and Security Technologies

We may use cookies or similar technologies to monitor website performance, detect suspicious activity, prevent abuse, and improve security.

These technologies may be provided by ANTELLAY Space or trusted third-party infrastructure and security providers.

3.5 Third-Party Cookies

Some third-party services integrated into our website may place or access their own cookies or similar technologies.

These services may include, depending on our current website configuration:

- Analytics providers;
- Hosting and infrastructure providers;
- Security providers;
- Embedded content providers;
- Communication services;
- API services; or
- Other technology providers.

Third-party cookies are governed by the respective provider's policies.

4. Cookies Used for Satellite and Space Data

ANTELLAY Space may use external APIs and technology services to display satellite, orbital, Earth observation, space-weather, geospatial, or related information.

The use of such services may involve technical identifiers, API requests, or other technologies necessary to deliver the relevant information.

The data itself may come from public or third-party sources and should not automatically be interpreted as personal information collected by ANTELLAY Space.

5. Managing Cookies

You can control or restrict cookies through your browser settings.

Most modern browsers allow you to:

- View stored cookies;
- Delete existing cookies;
- Block cookies;
- Allow cookies only from certain websites; or
- Receive notifications before cookies are stored.

If you disable certain cookies, some website functionality may not operate correctly.

6. Browser Controls

Cookie controls are generally available in your browser's privacy or security settings.

Because browser interfaces and controls can change, please refer to your browser provider's current documentation for instructions.

7. Do Not Track

Some browsers provide a “Do Not Track” or similar setting.

Because there is currently no universal technical standard governing all Do Not Track signals, our website may not respond to every such signal in the same way.

Where required by applicable law, we will follow applicable requirements concerning user privacy choices and tracking technologies.

8. Personal Information and Cookies

Cookies themselves may sometimes contain or be associated with information that can identify or relate to a user or device.

Where cookie-related information constitutes personal information under applicable law, we will handle it in accordance with our **Privacy Policy** and applicable data-protection requirements.

We do not use cookies as a means of intentionally collecting sensitive personal information unless legally permitted and appropriately disclosed.

9. Changes to This Cookie Policy

We may update this Cookie Policy when our website, technology, services, analytics tools, or legal requirements change.

The “**Last Updated**” date at the top of this page will indicate when the Policy was most recently revised.

10. Contact Us

If you have questions about our use of cookies or similar technologies, please contact:

Disclaimer

Last Updated: 15 September 2026

The information, data, software, visualizations, analyses, and other materials available through the **ANTELLAY Space** website and related platforms are provided for general informational, research, technology-development, and demonstration purposes.

ANTELLAY Space is operated by **ANTELLAY Labs**.

By accessing or using the Platform, you acknowledge and agree to the following disclaimer.

1. Space and Satellite Data

ANTELLAY Space may provide live, near-real-time, historical, or processed information relating to:

- Satellites;
- Orbital positions;
- Space objects;
- Earth observation;
- Space weather;
- Geospatial information;
- Telemetry or simulated telemetry;
- Orbital calculations;
- Satellite-related events; and
- Other space-related datasets.

Some information may be obtained from publicly available sources, third-party providers, APIs, datasets, or other authorized sources.

ANTELLAY Space does not necessarily own, operate, control, or communicate directly with the satellites, spacecraft, sensors, ground stations, or other infrastructure represented by such information.

2. Live Data Disclaimer

Although ANTELLAY Space may display live or near-real-time information, the availability of data does not guarantee that it is:

- Instantaneous;
- Complete;
- Error-free;
- Continuously available;
- Precisely accurate;
- Free from transmission delays; or
- Suitable for mission-critical decisions.

Data may be delayed, interrupted, revised, unavailable, or changed by the underlying data provider.

3. Third-Party Data

Satellite and space-related information displayed through ANTELLAY Space may originate from third-party services.

ANTELLAY Space does not guarantee the accuracy, completeness, availability, reliability, or continued operation of third-party data sources.

Where applicable, third-party datasets remain subject to their respective licenses, terms, and conditions.

4. AI and Machine-Generated Information

ANTELLAY Space may use artificial intelligence, machine learning, algorithms, simulations, predictive models, and automated systems.

AI-generated information may include:

- Predictions;
- Recommendations;
- Classifications;

- Simulations;
- Risk indicators;
- Pattern recognition;
- Forecasts;
- Automated analysis; and
- Other machine-generated outputs.

Such outputs may contain errors, assumptions, incomplete information, or unexpected results.

AI-generated information should therefore be independently reviewed and verified before being relied upon for important decisions.

5. SpaceOS Disclaimer

SpaceOS and related ANTELLAY Space technologies represent software and intelligence infrastructure designed to support the analysis, monitoring, simulation, prediction, and management of space-related information.

The availability of a SpaceOS feature, demonstration, visualization, model, or prototype does not mean that it has been certified or approved for a particular spacecraft, satellite, launch vehicle, mission, defense application, aviation application, or other operational environment.

Specific operational capabilities may require separate testing, validation, certification, hardware integration, regulatory approval, and contractual arrangements.

6. No Mission-Critical Reliance

Unless expressly agreed under a separate written contract, ANTELLAY Space information and technology should **not be used as the sole source of information for mission-critical, safety-critical, navigation-critical, defense-critical, emergency-response, aviation, or life-critical decisions.**

Users should independently verify relevant information using appropriate professional, scientific, engineering, governmental, or mission-specific sources.

7. No Guarantee of Predictions

Any forecast, prediction, simulation, recommendation, or estimated outcome provided through ANTELLAY Space is based on available information, models, assumptions, and computational methods.

Actual events may differ from predicted or simulated outcomes.

ANTELLAY Space does not guarantee that predictions or recommendations will accurately describe future events.

8. No Satellite Ownership or Operator Representation

The appearance of a satellite, spacecraft, orbital object, ground station, or other space asset on the Platform does not constitute a representation that ANTELLAY Space:

- Owns that asset;
- Operates that asset;
- Controls that asset;
- Has a commercial relationship with its operator; or
- Has direct access to its onboard systems.

References to third-party organizations, satellites, spacecraft, or technologies are provided for informational or analytical purposes unless expressly stated otherwise.

9. Demonstrations and Future Technology

ANTELLAY Space may publish information concerning products, technologies, architectures, prototypes, research, future capabilities, planned services, or development roadmaps.

Such information represents current development direction and may change.

A reference to a future product or capability does not guarantee that it will be launched, completed, commercially offered, or available within a particular timeframe.

10. Regulatory and Legal Compliance

Space activities may be subject to national and international laws, regulations, licenses, authorizations, export controls, telecommunications requirements, remote-sensing regulations, cybersecurity requirements, and other applicable rules.

The information provided by ANTELLAY Space does not constitute legal, regulatory, engineering, scientific, financial, or investment advice.

Users are responsible for determining and complying with the laws and regulations applicable to their activities.

11. No Investment Advice

Information concerning the space economy, market opportunities, business plans, funding, partnerships, technology development, or future commercial opportunities does not constitute financial or investment advice.

Nothing on the Platform should be interpreted as an offer or solicitation to purchase securities or make an investment.

Any investment or commercial opportunity involving ANTELLAY Labs or an associated entity will be governed by separate documentation.

12. External Links and Services

The Platform may contain links, embedded content, APIs, datasets, or references to third-party websites and services.

ANTELLAY Space does not control and is not responsible for the availability, accuracy, security, content, or policies of third-party services.

Users should review the applicable terms and policies of third-party providers before relying on their information or services.

13. Website Availability

ANTELLAY Space does not guarantee that the website or Platform will always be available, uninterrupted, secure, or free from technical errors.

Maintenance, upgrades, infrastructure failures, cyber incidents, third-party outages, network problems, and other circumstances may temporarily affect availability.

14. Limitation of Responsibility

To the maximum extent permitted by applicable law, ANTELLAY Space and ANTELLAY Labs shall not be responsible for losses or damages arising solely from reliance on:

- Satellite or orbital information;
- Third-party datasets;
- Live or near-real-time data;
- AI-generated outputs;
- Predictions or simulations;
- Technical visualizations;
- External APIs;
- Website availability; or
- Information obtained through the Platform.

Nothing in this Disclaimer excludes liability that cannot legally be excluded under applicable law.

15. User Responsibility

Users are responsible for independently evaluating information obtained through ANTELLAY Space before using it for any significant purpose.

Professional users should apply appropriate engineering, scientific, operational, cybersecurity, regulatory, and safety procedures relevant to their activities.

16. Changes to This Disclaimer

ANTELLAY Space may update this Disclaimer as our technology, services, data sources, and platform capabilities evolve.

The “**Last Updated**” date at the top of this page indicates when this Disclaimer was most recently revised.

17. Contact

Legal Notice & Contact

Last Updated: 15 September 2026

1. Website Operator

The **ANTELLAY Space** website and related technology initiative are operated by:

ANTELLAY Labs

Jaipur, Rajasthan, India

Brand / Initiative: ANTELLAY Space

ANTELLAY Space is focused on developing technology and intelligence infrastructure for the space economy, including artificial intelligence, satellite data, orbital intelligence, analytics, simulation, monitoring, and related software technologies.

2. Official Contact

For general inquiries, partnerships, technology discussions, business opportunities, media inquiries, or other communications:

ANTELLAY Space

Operated by **ANTELLAY Labs**

Jaipur, Rajasthan, India

Email: space@antellay.com

Phone: +91 97846 26443

3. Technology and Data

ANTELLAY Space may provide access to satellite, orbital, Earth observation, space-weather, geospatial, and other space-related information.

Some information may be obtained through public sources, third-party APIs, datasets, or other authorized providers.

The presence of third-party data, satellite information, spacecraft information, or other external content on this website does not necessarily indicate ownership, operation, control, partnership, or affiliation with the relevant third party.

4. Intellectual Property

The ANTELLAY Space name, logos, branding, website design, original text, software, interfaces, concepts, architecture, documentation, graphics, and other proprietary materials are owned by or licensed to ANTELLAY Labs unless otherwise stated.

Third-party names, trademarks, logos, datasets, satellite information, imagery, and other materials belong to their respective owners.

Unauthorized copying, reproduction, modification, distribution, or commercial use of ANTELLAY Space proprietary materials is prohibited, subject to applicable law.

5. External Links

This website may contain links to third-party websites, APIs, datasets, documentation, or services.

Such links are provided for informational or functional purposes. ANTELLAY Space does not necessarily endorse or control third-party websites or services.

Users should review the applicable terms and privacy policies of those third parties.

6. No Professional Advice

Information provided through this website is not intended to constitute:

- Engineering advice;
- Scientific advice;
- Legal advice;
- Regulatory advice;
- Financial or investment advice;
- Mission-control instructions; or
- Safety-critical operational guidance.

Users should obtain appropriate professional advice and independently verify information before making consequential decisions.

7. Live and Third-Party Data

ANTELLAY Space may display live or near-real-time information.

Data may be subject to delays, interruptions, revisions, calculation differences, technical errors, or limitations originating from external data sources and infrastructure.

Users should refer to the **Disclaimer** and **Terms & Conditions** for additional information.

8. Reporting a Legal or Security Concern

If you believe that:

- Content on the website infringes your intellectual-property rights;
- Your personal information has been handled improperly;
- You have identified a significant security issue; or
- There is another legal or compliance concern relating to the Platform,

please contact us using the official contact details above.

For security-related reports, please provide sufficient technical information for our team to understand and investigate the issue. Do not attempt to access, modify, delete, or disrupt systems or data belonging to ANTELLAY Space.

9. Governing Law

This Legal Notice is governed by the applicable laws of **India**.

Subject to applicable law, disputes relating to this website or ANTELLAY Space shall be subject to the jurisdiction of the competent courts in **Jaipur, Rajasthan, India**.

10. Related Policies

For additional information, please review:

- **Terms & Conditions**
- **Privacy Policy**
- **Cookie Policy**
- **Disclaimer**
- **Data & API Policy**
- **Acceptable Use Policy**

11. Changes to This Notice

ANTELLAY Space may update this Legal Notice when our organization, technology, services, contact information, or legal requirements change.

The “**Last Updated**” date will be revised when material changes are made.

Building the AI Operating System for the Space Economy.

Data & API Policy

Last Updated: 15 September 2026

This Data & API Policy explains how **ANTELLAY Space**, operated by **ANTELLAY Labs**, handles satellite, orbital, geospatial, Earth observation, space-weather, telemetry-related, and other data accessed through APIs, public sources, licensed datasets, and technology providers.

This Policy applies to data displayed, processed, analyzed, visualized, or otherwise used through the ANTELLAY Space website and related technology platforms.

1. Our Data Approach

ANTELLAY Space is building technology infrastructure for the space economy with a focus on:

- Satellite intelligence;

- Orbital intelligence;
- Space data;
- Earth observation;
- Space-weather information;
- Geospatial information;
- AI-driven analysis;
- Simulation;
- Monitoring;
- Prediction; and
- Decision-support technologies.

We may combine information from multiple sources to create software interfaces, visualizations, analytical outputs, models, and other technology capabilities.

2. Sources of Data

Data used by ANTELLAY Space may come from:

- Publicly available datasets;
- Government or institutional sources;
- Open-data platforms;
- Public satellite catalogs;
- Third-party APIs;
- Licensed datasets;
- Commercial data providers;
- Research organizations;
- Technology partners;
- User-provided information; and
- Data generated or calculated by ANTELLAY Space systems.

The specific source of particular data may vary depending on the feature or service.

3. Third-Party Data Ownership

ANTELLAY Space does not claim ownership of third-party data unless expressly stated.

Satellite information, imagery, orbital datasets, maps, telemetry, scientific datasets, trademarks, logos, and other materials may belong to their respective owners.

Use of third-party data is subject to the applicable license, terms, attribution requirements, and usage restrictions of the relevant provider.

4. Live and Near-Real-Time Data

Certain ANTELLAY Space features may use live or near-real-time data.

The term “live” or “real-time” refers to the availability of data through a connected source or system and does not necessarily mean that the information is instantaneous.

Data may experience:

- Network delays;
- Processing delays;
- API delays;
- Provider-side delays;
- Temporary outages;
- Data revisions;
- Synchronization differences; or
- Other technical limitations.

ANTELLAY Space does not guarantee uninterrupted availability or instantaneous delivery of third-party data.

5. API Usage

ANTELLAY Space may connect to third-party APIs to retrieve, process, or display relevant information.

API usage may be subject to:

- Rate limits;
- Authentication requirements;
- Usage quotas;
- Provider availability;
- Licensing restrictions;
- Attribution requirements;
- Commercial-use restrictions; and
- Changes made by the API provider.

If a third-party provider changes, restricts, or terminates an API, the corresponding ANTELLAY Space feature may be affected.

6. Data Processing and Transformation

ANTELLAY Space may process data obtained from external sources.

Processing may include:

- Normalization;

- Cleaning;
- Filtering;
- Classification;
- Aggregation;
- Geospatial processing;
- Orbital calculations;
- Visualization;
- Statistical analysis;
- Machine-learning analysis;
- AI-based interpretation; and
- Generation of derived information.

Processed or derived information may differ from the original source data.

7. Derived Data

ANTELLAY Space may create derived datasets, analytics, indicators, models, visualizations, predictions, simulations, and other outputs using multiple data sources.

The existence of a derived output does not necessarily mean that ANTELLAY Space owns all underlying source data.

Ownership and permitted use of derived outputs may depend on the applicable source licenses, agreements, and applicable law.

8. Data Accuracy

ANTELLAY Space makes reasonable efforts to process and present information accurately.

However, data obtained from external sources may contain errors, omissions, delays, outdated information, or inconsistencies.

ANTELLAY Space does not guarantee that all data will be:

- Accurate;
- Complete;
- Current;
- Continuous;
- Error-free; or
- Suitable for a particular application.

Critical information should be independently verified against appropriate authoritative sources.

9. Orbital and Satellite Information

Orbital positions, trajectories, satellite identifiers, object classifications, predicted passes, and related information may be based on calculations, publicly available orbital information, third-party datasets, or other sources.

Such information may change as new observations and updated orbital information become available.

ANTELLAY Space does not guarantee the precise future position, behavior, or operational status of any satellite or space object.

10. Earth Observation and Geospatial Data

Where Earth observation, remote-sensing, mapping, or geospatial data is used, the availability, resolution, accuracy, licensing, and permitted uses may vary depending on the underlying provider.

Users are responsible for complying with applicable restrictions when using third-party imagery or geospatial datasets.

11. AI-Generated and Analytical Data

ANTELLAY Space may use AI and machine-learning systems to analyze data and generate insights.

AI-generated outputs may include:

- Predictions;
- Recommendations;
- Classifications;
- Risk indicators;
- Forecasts;
- Simulations; and
- Other analytical results.

These outputs are not guaranteed to be accurate and should be independently reviewed before being used for consequential decisions.

12. API and Data Misuse

Users must not use ANTELLAY Space APIs, data interfaces, or website infrastructure to:

- Circumvent access controls;
- Exceed authorized usage limits;
- Conduct unauthorized scraping;
- Reverse engineer protected systems;
- Attack or disrupt infrastructure;
- Introduce malicious code;
- Attempt unauthorized system access;
- Redistribute restricted third-party data; or
- Violate applicable data or API licenses.

ANTELLAY Space may restrict or terminate access where misuse is detected or reasonably suspected.

13. Redistribution

Unless expressly permitted, users may not commercially redistribute, resell, mirror, bulk-download, republish, or provide third-party access to ANTELLAY Space proprietary datasets or API outputs.

Third-party data may have additional redistribution restrictions imposed by its original provider.

14. Attribution

Where a third-party data provider requires attribution, ANTELLAY Space may provide appropriate attribution within the relevant interface, documentation, or associated materials.

Users who further distribute permitted data are responsible for preserving applicable attribution and licensing notices.

15. Changes to Data Sources

ANTELLAY Space may add, remove, replace, or modify data sources and APIs as our technology develops.

A particular dataset or API may become unavailable due to:

- Provider changes;
- Licensing changes;
- Technical limitations;
- Cost changes;
- Service discontinuation;
- Regulatory requirements; or
- Other operational reasons.

16. No Guarantee of Data Availability

ANTELLAY Space does not guarantee continuous access to any particular data source, satellite dataset, API, external service, or data feed.

Temporary or permanent interruption of a data source may affect related Platform functionality.

17. Mission-Critical Use

ANTELLAY Space data and API outputs should not be treated as the sole source of information for safety-critical, mission-critical, navigation-critical, defense-critical, emergency-response, aviation, or life-critical operations unless expressly authorized under a separate written agreement and appropriately validated for that specific use.

18. Security

We may implement reasonable security controls around APIs, data interfaces, authentication systems, and infrastructure.

Users must not attempt to bypass or compromise such controls.

Any suspected security vulnerability should be reported through our official contact channel rather than exploited.

19. Compliance

Users are responsible for ensuring that their use of ANTELLAY Space data and APIs complies with all applicable laws, regulations, licenses, contracts, and third-party terms.

Depending on the data or use case, additional requirements may apply to areas such as:

- Space activities;
- Remote sensing;
- Geospatial information;
- Telecommunications;
- Cybersecurity;
- Export controls;
- Data protection; and
- Intellectual property.

20. Policy Changes

ANTELLAY Space may update this Data & API Policy as our data infrastructure, APIs, providers, products, and legal requirements evolve.

The “**Last Updated**” date at the top of this page indicates when the Policy was most recently revised.

21. Contact

For questions regarding data sources, API usage, licensing, attribution, or data-related concerns, contact:

AI & SpaceOS Disclaimer

Last Updated: 15 September 2026

This AI & SpaceOS Disclaimer explains the limitations and intended use of artificial intelligence, machine-learning systems, predictive models, simulations, automated analytics, and related technologies made available or proposed by **ANTELLAY Space**, operated by **ANTELLAY Labs**.

1. Purpose of AI and SpaceOS

ANTELLAY Space is developing an AI-driven technology layer for the space economy.

Our technology vision may include capabilities such as:

Monitor → Predict → Simulate → Recommend → Operate

These capabilities are intended to help process complex space-related information and support analysis, research, planning, monitoring, and decision-making.

2. AI-Generated Outputs

ANTELLAY Space may use artificial intelligence and machine-learning technologies to generate or assist with:

- Data analysis;
- Satellite monitoring;
- Orbital analysis;
- Pattern detection;
- Predictions;
- Forecasting;
- Risk indicators;
- Simulations;
- Recommendations;
- Anomaly detection;
- Automated reports;
- Natural-language interfaces; and
- Other analytical outputs.

AI-generated outputs may contain inaccuracies, incomplete reasoning, incorrect assumptions, or unexpected results.

Users should independently evaluate and verify important outputs.

3. AI Does Not Guarantee Accuracy

AI systems operate using models, data, algorithms, assumptions, and computational processes.

Even when an AI system produces a confident result, that result may be incorrect.

ANTELLAY Space does not guarantee that an AI-generated output will:

- Be accurate;
- Be complete;
- Reflect current conditions;
- Predict future events correctly;
- Detect every anomaly;
- Identify every risk;
- Produce the optimal recommendation; or
- Remain accurate when underlying conditions change.

4. SpaceOS

SpaceOS is the technology architecture and platform vision developed by ANTELLAY Space for intelligence-driven space operations and space-data workflows.

Depending on the stage of development, SpaceOS may include or integrate:

- Satellite data;
- Orbital data;
- Earth observation data;
- Space-weather data;
- Telemetry;
- Simulated telemetry;
- AI models;
- Digital models;
- Simulations;
- External APIs;
- Cloud infrastructure;
- Data-processing systems; and
- Other technology components.

The availability of a SpaceOS interface, feature, demonstration, prototype, or concept does not necessarily mean that the system is connected to or controlling a real spacecraft or satellite.

5. Human Oversight

ANTELLAY Space technology is intended to support human decision-making rather than automatically replace qualified human judgment in critical environments.

For consequential applications, users should apply appropriate:

- Engineering review;
- Scientific validation;
- Mission procedures;
- Security controls;
- Regulatory compliance;
- Operational verification; and
- Human oversight.

6. Mission-Critical Applications

Unless expressly authorized under a separate written agreement, ANTELLAY Space AI and SpaceOS technologies should not be relied upon as the sole decision-making system for:

- Spacecraft operations;
- Launch operations;
- Collision avoidance;
- Navigation;
- Defense operations;
- Aviation safety;
- Emergency response;
- Life-critical systems; or
- Other safety-critical applications.

Any use in such environments requires appropriate testing, validation, engineering controls, redundancy, and regulatory compliance.

7. Predictions and Forecasts

ANTELLAY Space may generate predictions or forecasts based on available datasets and computational models.

Predictions represent estimates rather than guaranteed future outcomes.

Actual events may differ significantly from predicted results due to changes in environmental conditions, incomplete data, unexpected events, model limitations, or other factors.

8. Simulations

Simulations provided through ANTELLAY Space may represent modeled or hypothetical scenarios.

A simulation does not necessarily represent actual spacecraft behavior, physical conditions, or mission outcomes.

Simulation results should not be interpreted as guaranteed representations of real-world events without appropriate validation.

9. Synthetic and Simulated Data

ANTELLAY Space may use synthetic or simulated data for:

- Testing;
- Demonstrations;
- Model development;
- Training;
- Research;
- Prototyping; and
- System validation.

Synthetic or simulated data should not be assumed to represent actual satellite telemetry, spacecraft conditions, or real-world observations unless expressly identified as such.

10. Training and Model Development

AI systems may be developed or evaluated using datasets from public sources, licensed sources, generated data, synthetic data, research datasets, or other authorized sources.

ANTELLAY Space will seek to use data in accordance with applicable licenses, permissions, agreements, and laws.

The specific datasets used by a particular AI system may vary by product and development stage.

11. Third-Party AI and Technology

ANTELLAY Space may use third-party software, cloud infrastructure, AI models, APIs, libraries, datasets, or other technology components.

Third-party technologies may have their own limitations, licenses, terms, and availability requirements.

ANTELLAY Space does not guarantee the continued availability or performance of third-party technology.

12. No Autonomous Control Assumption

The presence of an AI recommendation, simulation, monitoring interface, or SpaceOS functionality does not by itself mean that ANTELLAY Space has autonomous control over a satellite, spacecraft, launch vehicle, ground station, or other physical space infrastructure.

Any actual integration or control capability would require appropriate technical integration, authorization, security measures, testing, and operational procedures.

13. Security and Responsible Use

Users must not use ANTELLAY Space AI or SpaceOS technology to:

- Gain unauthorized access to systems;
- Attack or disrupt infrastructure;
- Circumvent security controls;
- Conduct unauthorized surveillance;
- Generate malicious software;
- Interfere with spacecraft or satellite systems; or
- Facilitate unlawful activity.

Access to particular capabilities may be restricted based on technical, legal, security, or commercial requirements.

14. Intellectual Property

AI-generated outputs, software, models, interfaces, architectures, datasets, documentation, and other materials may be subject to intellectual-property rights and third-party licenses.

Users should not assume that any output or data obtained through ANTELLAY Space is free of third-party restrictions.

Specific commercial products or enterprise deployments may be governed by separate agreements.

15. No Professional Advice

ANTELLAY Space AI and SpaceOS outputs do not constitute professional:

- Engineering;
- Scientific;
- Legal;
- Regulatory;
- Financial;
- Investment; or
- Safety advice.

Users remain responsible for obtaining appropriate professional advice where necessary.

16. Technology Development

ANTELLAY Space is an evolving technology initiative.

AI capabilities, SpaceOS architecture, interfaces, models, integrations, data sources, and operational features may change as research and development progresses.

A capability described on the website may be experimental, under development, available only as a demonstration, or subject to future changes.

17. No Guarantee of Future Capabilities

References to planned AI capabilities, autonomous systems, predictive technologies, integrations, or future SpaceOS functionality describe development objectives or technology direction.

They do not constitute a guarantee that a particular feature will be launched, commercially released, integrated, certified, or available within a particular timeframe.

18. User Responsibility

Users are responsible for evaluating whether ANTELLAY Space AI or SpaceOS technology is appropriate for their intended use.

Where a decision could materially affect safety, property, finances, operations, or legal compliance, users should use qualified human review and independent authoritative sources.

19. Limitation of Liability

To the maximum extent permitted by applicable law, ANTELLAY Space and ANTELLAY Labs shall not be responsible for losses or damages arising from reliance on AI-generated information, predictions, simulations, recommendations, automated analysis, or other outputs.

Nothing in this Disclaimer excludes liability that cannot legally be excluded under applicable law.

20. Updates to This Disclaimer

We may update this Disclaimer as our AI technologies, SpaceOS platform, products, data sources, and services evolve.

The “**Last Updated**” date at the top of this page indicates the latest revision.

21. Contact

Acceptable Use Policy

Last Updated: 15 September 2026

This Acceptable Use Policy (“AUP”) establishes the rules and standards for accessing and using the **ANTELLAY Space** website, software, APIs, data interfaces, AI systems, SpaceOS technologies, and related services (collectively, the “Platform”).

ANTELLAY Space is operated by **ANTELLAY Labs**.

By accessing or using the Platform, you agree to comply with this Policy, our **Terms & Conditions**, **Privacy Policy**, **Data & API Policy**, and other applicable policies.

1. Permitted Use

You may use ANTELLAY Space for lawful purposes, including:

- Space and satellite research;
- Educational activities;
- Data analysis;
- Technology development;
- Software development;
- Scientific exploration;
- Business research;
- Space-industry applications;
- Viewing publicly available satellite and orbital information;
- Testing authorized APIs and software features; and
- Other legitimate purposes permitted by ANTELLAY Space.

Your use must comply with applicable laws, regulations, licenses, and third-party terms.

2. Prohibited Activities

You must not use the Platform to engage in, facilitate, encourage, or attempt any unlawful or harmful activity.

This includes:

2.1 Unauthorized Access

You must not:

- Attempt to access restricted systems;
- Bypass authentication;
- Circumvent access controls;
- Obtain credentials belonging to another person;
- Access another user's account without authorization; or
- Attempt to gain access to ANTELLAY Space infrastructure without permission.

2.2 Cybersecurity Abuse

You must not use the Platform to:

- Launch cyberattacks;
- Deploy malware;
- Distribute ransomware;
- Conduct unauthorized penetration testing;
- Conduct denial-of-service attacks;
- Scan or probe systems without authorization;
- Exploit security vulnerabilities;
- Interfere with network infrastructure; or
- Facilitate unauthorized compromise of computer systems.

Authorized security testing may only be performed with prior written permission.

2.3 Interference With Space Infrastructure

You must not use ANTELLAY Space technologies, information, or interfaces to unlawfully interfere with:

- Satellites;
- Spacecraft;
- Ground stations;
- Communication systems;
- Navigation systems;
- Launch systems;
- Space-data infrastructure; or
- Other physical or digital space infrastructure.

ANTELLAY Space does not authorize users to attempt to control, disrupt, manipulate, jam, spoof, or otherwise interfere with spacecraft or satellite systems through the Platform.

3. Data and API Restrictions

Where APIs or data interfaces are made available, users must comply with the applicable API documentation, limits, licenses, and agreements.

You must not:

- Circumvent rate limits;
- Use multiple accounts to evade usage restrictions;
- Create excessive automated traffic;
- Scrape protected information;
- Bulk-download restricted data;
- Resell unauthorized API access;
- Redistribute restricted datasets;
- Remove required attribution; or
- Use data in violation of its source license.

4. Automated Access

Automated access, bots, scripts, crawlers, or other software may only be used where expressly permitted by ANTELLAY Space or the applicable API/service terms.

Automated activity must not:

- Overload infrastructure;
- Circumvent technical controls;
- Impair availability;
- Collect personal information without authorization; or
- Interfere with normal Platform operations.

5. Reverse Engineering

Unless expressly permitted by applicable law or written agreement, you must not attempt to:

- Reverse engineer proprietary software;
- Decompile protected applications;
- Extract proprietary algorithms;
- Circumvent technical protection measures;
- Reconstruct private APIs; or
- Copy proprietary system architecture for unauthorized purposes.

6. AI and SpaceOS Use

ANTELLAY Space may provide AI-powered features, predictive models, simulations, automated analysis, or SpaceOS functionality.

Users must not use these technologies to:

- Circumvent security controls;
- Generate or facilitate malicious activity;
- Make unauthorized decisions affecting third-party systems;
- Interfere with spacecraft or satellite infrastructure;
- Facilitate unlawful surveillance;
- Conduct unauthorized cyber operations; or
- Create systems intended to cause harm.

AI-generated outputs should be independently reviewed before being used for consequential decisions.

7. Mission-Critical Use

Unless expressly authorized under a separate written agreement, users must not rely on ANTELLAY Space as the sole source of information for:

- Safety-critical operations;
- Mission-critical spacecraft operations;
- Collision avoidance;
- Navigation;
- Emergency response;
- Aviation safety;
- Defense operations; or
- Life-critical systems.

Appropriate professional, engineering, scientific, and operational validation must be used for such applications.

8. Personal Information

Users must not use ANTELLAY Space to unlawfully collect, process, monitor, expose, or distribute another person's personal information.

You are responsible for ensuring that any personal information you submit or process through the Platform is collected and used lawfully.

9. Intellectual Property

Users must respect the intellectual-property rights of ANTELLAY Space, ANTELLAY Labs, third-party data providers, software developers, satellite operators, research organizations, and other rights holders.

You must not use the Platform to infringe copyrights, trademarks, patents, trade secrets, database rights, or other intellectual-property rights.

10. Illegal or Harmful Content

You must not use the Platform to create, upload, transmit, distribute, or facilitate content or activity that is unlawful or intended to cause harm.

This includes content or activity involving:

- Fraud;
- Identity theft;
- Unauthorized access;
- Malware;
- Cyberattacks;
- Threats;
- Harassment;
- Illegal surveillance;
- Abuse of third-party systems; or
- Other unlawful activity.

11. Misrepresentation

You must not falsely represent:

- That you are ANTELLAY Space;
- That you work for ANTELLAY Labs;
- That you are authorized to represent ANTELLAY Space;
- That ANTELLAY Space operates a particular satellite;
- That ANTELLAY Space owns third-party space infrastructure; or
- That ANTELLAY Space has endorsed a product, service, organization, or activity when it has not.

12. Data Integrity

You must not intentionally manipulate, falsify, alter, or misrepresent ANTELLAY Space data in a manner that could mislead another person about its source or accuracy.

If you use ANTELLAY Space data in research, publications, presentations, products, or commercial services, you should preserve applicable source information and attribution requirements.

13. Responsible Security Research

ANTELLAY Space welcomes responsible reports of legitimate security vulnerabilities.

If you identify a potential security vulnerability, please contact us before publicly disclosing technical details or attempting further exploitation.

Security researchers must not:

- Access unnecessary data;
- Modify or delete information;
- Disrupt services;
- Exfiltrate information beyond what is reasonably necessary to demonstrate the issue; or
- Continue testing after being asked to stop.

14. Enforcement

ANTELLAY Space may investigate suspected violations of this Policy.

Where appropriate, we may:

- Issue a warning;
- Restrict access;
- Suspend an account;
- Terminate access;
- Block API requests;
- Remove unauthorized content;
- Preserve relevant information;
- Take technical security measures; or
- Report suspected unlawful activity to appropriate authorities.

We may take immediate action where necessary to protect users, infrastructure, data, or security.

15. Reporting Violations

If you believe that someone is abusing ANTELLAY Space or violating this Policy, please contact us.

When reporting an issue, provide as much relevant information as reasonably possible, including:

- Description of the issue;
- Relevant URL or service;

- Approximate date and time;
- Technical information where applicable; and
- Any evidence that can help us investigate.

Do not include unnecessary personal or sensitive information.

16. Third-Party Services

Third-party APIs, datasets, websites, cloud services, and other integrations may have additional acceptable-use requirements.

Where applicable, users must comply with those additional requirements.

A violation of a third-party provider's terms may also affect your ability to use the corresponding ANTELLAY Space functionality.

17. Compliance With Law

Your use of the Platform must comply with all applicable local, national, and international laws and regulations.

Depending on the use case, this may include requirements relating to:

- Cybersecurity;
- Data protection;
- Intellectual property;
- Telecommunications;
- Remote sensing;
- Space activities;
- Export controls;
- Sanctions; and
- Other applicable regulatory requirements.

18. No Authorization for Physical Interference

Nothing in this Policy or the Platform should be interpreted as granting permission to access, control, interfere with, disrupt, jam, spoof, manipulate, or damage any satellite, spacecraft, ground station, communication system, or other physical infrastructure.

Any legitimate integration with physical space infrastructure requires appropriate authorization, technical controls, agreements, and applicable regulatory approvals.

19. Changes to This Policy

ANTELLAY Space may update this Acceptable Use Policy as our Platform, technologies, APIs, services, and legal requirements evolve.

The “**Last Updated**” date will indicate the latest revision.

Continued use of the Platform after an updated Policy becomes effective constitutes acceptance of the revised Policy, to the extent permitted by applicable law.

20. Contact

Intellectual Property Policy

Last Updated: 15 September 2026

This Intellectual Property Policy explains the ownership, permitted use, and protection of intellectual property associated with **ANTELLAY Space**, operated by **ANTELLAY Labs**.

It applies to the ANTELLAY Space website, software, interfaces, AI technologies, SpaceOS architecture, original content, documentation, visualizations, branding, and related materials.

1. Ownership

Unless expressly stated otherwise, intellectual property created specifically for ANTELLAY Space is owned by, or used under license by, **ANTELLAY Labs**.

This may include:

- ANTELLAY Space branding;
- Logos and visual identity;
- Website design;
- User interfaces;
- Software;
- Source code;
- System architecture;
- SpaceOS concepts and architecture;
- AI and machine-learning technologies;
- Models and model configurations;
- Algorithms;
- Databases created by ANTELLAY Space;
- Documentation;
- Technical specifications;
- Original graphics;
- Written content;
- Product concepts;
- Research and development materials; and
- Other proprietary technology and materials.

2. ANTELLAY Space Brand

The name **ANTELLAY Space**, associated logos, marks, slogans, visual identity, and other brand elements may be protected by applicable trademark and intellectual-property laws.

You may not use ANTELLAY Space branding in a manner that:

- Suggests unauthorized affiliation;
- Suggests endorsement;
- Creates confusion regarding ownership;
- Misrepresents a partnership; or
- Damages the reputation of ANTELLAY Space.

Any permitted reference to ANTELLAY Space should be accurate and should not imply an official relationship unless one exists.

3. SpaceOS Intellectual Property

SpaceOS refers to ANTELLAY Space's software and technology architecture intended to support intelligence-driven space-data and operational workflows.

The SpaceOS name, architecture, interfaces, software, concepts, technical implementations, documentation, and related proprietary materials may constitute intellectual property of ANTELLAY Labs or its licensors.

Publicly describing a technology concept does not automatically grant another person permission to copy, reproduce, commercialize, or implement proprietary elements of that technology.

4. Software and Source Code

Unless expressly made available under an open-source license or separate written agreement, software and source code belonging to ANTELLAY Space are proprietary.

You may not, without authorization:

- Copy source code;
- Reproduce proprietary software;
- Sell or sublicense proprietary software;
- Distribute copies;
- Modify proprietary software for unauthorized commercial use;
- Reverse engineer protected software;
- Extract proprietary algorithms; or
- Circumvent technical protections.

Nothing in this Policy restricts rights that cannot legally be restricted under applicable law.

5. AI and Machine-Learning Technology

ANTELLAY Space may develop or use:

- AI models;
- Machine-learning systems;
- Algorithms;
- Data-processing pipelines;
- Predictive models;
- Simulation systems;
- Automated analysis;
- AI agents; and
- Related infrastructure.

The underlying technology, model architecture, training methodology, proprietary datasets, system prompts, configurations, software, and supporting infrastructure may contain confidential or proprietary information.

Access to an AI-powered feature does not automatically grant ownership of the underlying technology.

6. Website Content

Unless otherwise indicated, original materials published on the ANTELLAY Space website are protected by applicable intellectual-property laws.

This may include:

- Text;
- Articles;
- Diagrams;
- Illustrations;
- Graphics;
- Interface designs;
- Presentations;
- Technical explanations;
- Product descriptions;
- Videos; and
- Other original materials.

You may view and use publicly available website content for personal or internal informational purposes, subject to these Terms.

Commercial reproduction requires appropriate authorization unless otherwise permitted by law.

7. Third-Party Intellectual Property

ANTELLAY Space may display or use materials owned by third parties.

Examples may include:

- Satellite data;
- Orbital datasets;
- Earth observation imagery;
- Maps;
- Scientific datasets;
- APIs;
- Software libraries;
- Logos;
- Trademarks;
- Research materials; and
- Other third-party content.

Such materials remain the property of their respective owners.

Their use may be subject to separate licenses, attribution requirements, terms, or restrictions.

8. Satellite and Orbital Data

The display or processing of satellite or orbital information on the ANTELLAY Space Platform does not mean that ANTELLAY Space owns the underlying data.

Where data is obtained from public or third-party sources, the relevant source's intellectual-property and licensing terms may apply.

Users must not assume that data available through ANTELLAY Space can automatically be copied, resold, redistributed, or commercially exploited without checking the applicable rights.

9. Open-Source Software

ANTELLAY Space may use open-source software components.

Such components remain subject to their respective open-source licenses.

Nothing in this Policy changes or overrides the rights granted under an applicable open-source license.

Where required, applicable notices or license information may be made available through relevant documentation or repositories.

10. User Submissions

If you voluntarily submit ideas, feedback, suggestions, technical information, or other material to ANTELLAY Space, you retain ownership of your intellectual property unless otherwise agreed.

However, you grant ANTELLAY Space permission to use feedback and suggestions for legitimate business, research, development, testing, and improvement purposes, unless a separate written agreement states otherwise.

Do not submit confidential or proprietary information unless an appropriate confidentiality agreement or secure process is in place.

11. Confidential Information

Certain ANTELLAY Space technology, business information, research, source code, architecture, technical documentation, product roadmaps, commercial information, and other materials may be confidential.

Public access to the website does not mean that all ANTELLAY Space information is non-confidential.

Confidential information should not be copied, disclosed, or used without appropriate authorization.

12. User-Generated Work

If you use ANTELLAY Space tools to create content, analysis, visualizations, or other materials, ownership and permitted use may depend on:

- The specific service;
- The underlying data;
- Third-party licenses;
- Your agreement with ANTELLAY Space;
- Applicable law; and
- Any additional product-specific terms.

You are responsible for ensuring that your use of third-party data or content does not infringe another party's rights.

13. Prohibited Intellectual-Property Use

You must not use ANTELLAY Space intellectual property to:

- Create misleading affiliation;
- Build unauthorized copies of proprietary systems;
- Reproduce proprietary website designs;
- Extract proprietary source code;
- Replicate confidential architecture;
- Sell proprietary ANTELLAY materials;
- Remove copyright or ownership notices;
- Misuse trademarks;
- Circumvent licensing restrictions; or
- Facilitate infringement of third-party rights.

14. Reporting Infringement

If you believe that material available through ANTELLAY Space infringes your intellectual-property rights, please contact us.

A useful infringement report should include:

- Your name and contact information;
- Identification of the protected work;
- Description of the alleged infringement;
- Location of the relevant material;
- Evidence of your rights, where appropriate; and
- Any other information reasonably necessary for us to investigate.

We may request additional information before taking action.

15. Unauthorized Use

ANTELLAY Labs reserves the right to take appropriate action against unauthorized use of its intellectual property, subject to applicable law.

Such action may include:

- Requesting removal;
- Restricting access;
- Suspending relevant services;
- Issuing legal notices;
- Pursuing available legal remedies; or
- Reporting unlawful activity where appropriate.

16. No Transfer of Rights

Your use of the ANTELLAY Space website or Platform does not transfer ownership of ANTELLAY Space intellectual property to you.

Except for limited rights expressly granted under applicable Terms or licenses, all rights remain with ANTELLAY Labs or the relevant rights holder.

17. Trademarks

Third-party trademarks, company names, product names, satellite names, organizational names, and logos appearing on the Platform belong to their respective owners.

Their appearance does not necessarily indicate affiliation, endorsement, or sponsorship.

18. Future Intellectual Property

As ANTELLAY Space develops new products, technologies, AI systems, software, research, and SpaceOS capabilities, additional intellectual property may be created.

Such future intellectual property may be protected through applicable mechanisms, including:

- Copyright;
- Trademark;
- Patent;
- Trade secret;
- Confidentiality;
- Contractual rights; and
- Other applicable protections.

19. No License by Implication

Nothing on the ANTELLAY Space website or Platform should be interpreted as granting an implied license to use ANTELLAY Labs or ANTELLAY Space intellectual property.

Any license not expressly granted remains reserved.

20. Changes to This Policy

ANTELLAY Space may update this Intellectual Property Policy as its technology, products, intellectual-property portfolio, and legal requirements evolve.

The “**Last Updated**” date will indicate the latest revision.

21. Contact

Service Agreement & SaaS Terms

Last Updated: 15 September 2026

These Service Agreement & SaaS Terms (“SaaS Terms”) govern the provision and use of software, cloud platforms, dashboards, APIs, analytics systems, AI technologies, SpaceOS functionality, data services, and other technology services provided by **ANTELLAY Space**, operated by **ANTELLAY Labs** (“ANTELLAY”, “we”, “us”, or “our”).

These SaaS Terms are intended to apply to commercial customers, organizations, businesses, research institutions, technology partners, and other authorized users of ANTELLAY Space services.

1. Scope

ANTELLAY Space may provide technology services including:

- SpaceOS;
- Satellite intelligence;
- Orbital monitoring;
- Space-data dashboards;
- AI-powered analytics;
- Predictive analytics;
- Simulation;
- Data processing;
- APIs;
- Monitoring tools;
- Enterprise software;
- Cloud-based applications;
- Data visualization; and
- Other space-technology services.

Specific services, features, pricing, service levels, and technical specifications may be described in a separate Order Form, Proposal, Statement of Work (“SOW”), or other written agreement.

2. Agreement Formation

A customer may access a commercial service after:

1. Accepting these SaaS Terms;
2. Signing an applicable agreement;
3. Accepting an Order Form or Proposal; or
4. Completing another authorized onboarding process.

If a separate written agreement conflicts with these SaaS Terms, the separate agreement will control for the specific subject matter covered by that agreement.

3. Customer Account

Where an account is required, the customer is responsible for:

- Providing accurate information;
- Maintaining account security;
- Protecting login credentials;
- Controlling authorized users; and
- Notifying ANTELLAY Space of suspected unauthorized access.

Customers are responsible for activity conducted through their accounts, subject to applicable law and the terms of the relevant agreement.

4. Authorized Users

Customers may allow designated employees, contractors, or other authorized personnel to access the services according to the purchased subscription or agreement.

Customers must ensure that authorized users comply with these Terms.

Accounts and access credentials must not be shared in a manner that circumvents licensing or user limits.

5. Subscription and Service Access

Where a service is provided on a subscription basis, the applicable Order Form will specify:

- Subscription period;
- Number of users;
- Service tier;
- Features;
- Usage limits;
- Pricing;
- Payment terms; and
- Any applicable service limitations.

Access is provided only for the period and scope agreed with the customer.

6. Fees and Payment

Commercial services may be subject to fees specified in an Order Form or applicable pricing schedule.

Unless otherwise agreed in writing:

- Fees are payable according to the agreed payment schedule;
- Applicable taxes may be charged separately;
- Customers are responsible for providing accurate billing information; and
- Late payments may result in suspension or other remedies permitted under the agreement.

All fees are subject to the applicable commercial agreement.

7. Service Availability

ANTELLAY Space will use reasonable efforts to maintain the availability of its commercial services.

However, continuous availability cannot be guaranteed.

Service interruptions may result from:

- Planned maintenance;
- Emergency maintenance;
- Cloud infrastructure issues;
- Third-party service failures;
- Network failures;
- Cybersecurity incidents;
- Data-provider outages;
- Force majeure events; or
- Other circumstances outside our reasonable control.

Enterprise customers may receive separate Service Level Agreements (“SLAs”) where expressly agreed.

8. Satellite and External Data

ANTELLAY Space services may depend on external satellite, orbital, Earth observation, space-weather, geospatial, telemetry, or other datasets.

Data availability, accuracy, frequency, resolution, and continuity may depend on third-party providers.

ANTELLAY Space does not guarantee the uninterrupted availability or accuracy of third-party data unless expressly agreed in writing.

9. AI and Analytical Services

Commercial services may include AI-generated or algorithmically generated:

- Predictions;
- Recommendations;
- Forecasts;
- Classifications;
- Simulations;
- Anomaly detection;
- Risk indicators; and
- Other analytical outputs.

Such outputs are decision-support information unless a specific service agreement expressly provides otherwise.

Customers remain responsible for appropriate human review and validation.

10. Customer Data

“Customer Data” means information, files, datasets, documents, telemetry, configurations, or other content submitted by a customer to an ANTELLAY Space service.

The customer retains ownership of its Customer Data, subject to rights necessary for ANTELLAY Space to provide the contracted services.

The customer represents that it has the necessary rights and permissions to provide Customer Data to ANTELLAY Space.

11. Processing of Customer Data

ANTELLAY Space may process Customer Data only as reasonably necessary to:

- Provide the contracted services;
- Maintain and secure the Platform;
- Provide technical support;
- Detect and prevent abuse;
- Improve reliability and performance; and
- Comply with applicable legal obligations.

Additional data-processing arrangements may apply to enterprise customers where required.

12. Customer Responsibilities

Customers are responsible for:

- The legality of Customer Data;
- Obtaining required permissions;
- Maintaining appropriate backups where necessary;
- Configuring user access appropriately;
- Using the service in accordance with applicable law; and
- Ensuring that the service is appropriate for the intended application.

Customers must not use the services in violation of the **Acceptable Use Policy**.

13. Intellectual Property

ANTELLAY Labs retains ownership of its:

- Software;
- Source code;
- AI technologies;
- Models;
- Algorithms;
- SpaceOS architecture;
- Interfaces;
- Documentation;
- Platform infrastructure;
- Proprietary datasets;
- Designs; and
- Other pre-existing or independently developed intellectual property.

Customer access to a service does not transfer ownership of ANTELLAY intellectual property.

14. Customer License

Subject to payment of applicable fees and compliance with the agreement, ANTELLAY Space grants the customer a limited, non-exclusive, non-transferable, and revocable right to access and use the applicable service during the subscription period.

The license is limited to the scope specified in the applicable agreement.

15. Restrictions

Customers must not, unless expressly authorized:

- Resell the service;

- Sublicense access;
- Copy proprietary software;
- Reverse engineer protected technology;
- Extract source code;
- Circumvent technical restrictions;
- Access services beyond authorized limits;
- Use the service to build an unauthorized competing product;
- Remove proprietary notices; or
- Attempt to gain unauthorized access to ANTELLAY infrastructure.

16. Security

ANTELLAY Space will implement reasonable security measures appropriate to the nature of the applicable service.

Customers are responsible for maintaining security of their accounts, credentials, devices, networks, and authorized users.

Customers should promptly notify ANTELLAY Space of suspected security incidents involving the service.

17. Confidentiality

Each party may receive confidential information from the other party.

The receiving party agrees to:

- Use confidential information only for legitimate purposes connected with the relationship;
- Protect it using reasonable safeguards; and
- Not disclose it to unauthorized third parties except where permitted or legally required.

Confidentiality obligations do not generally apply to information that is publicly available, independently developed, lawfully received from another source, or required to be disclosed by law.

Separate NDAs may be used for sensitive enterprise or research relationships.

18. Third-Party Services

ANTELLAY Space may use third-party infrastructure, APIs, cloud services, data providers, software components, and other technologies.

Third-party services may have separate terms and limitations.

A third-party outage or change may affect ANTELLAY Space service availability.

19. Support

Support services, response times, maintenance windows, and technical assistance may vary according to the customer's service plan.

Enterprise customers may receive separate support and SLA terms.

20. Updates and Changes

ANTELLAY Space may update, improve, modify, or replace service features over time.

We may introduce:

- New functionality;
- Security updates;
- Performance improvements;
- Interface changes;
- New data sources;
- AI model improvements; or
- Technology changes.

Material commercial changes may be addressed through the applicable agreement.

21. Beta and Experimental Features

ANTELLAY Space may provide beta, preview, experimental, or research features.

Such features may:

- Be incomplete;
- Contain errors;
- Change significantly;
- Have limited availability;
- Be withdrawn; or
- Not become part of a commercial product.

Unless expressly agreed otherwise, experimental features are provided without guarantees of production readiness.

22. Mission-Critical Applications

Unless expressly agreed under a separate written contract, ANTELLAY Space services are not represented as certified mission-critical or safety-critical systems.

Customers must not rely solely on ANTELLAY Space services for:

- Collision avoidance;
- Spacecraft safety;
- Launch safety;
- Aviation safety;
- Emergency response;
- Life-critical operations; or
- Other safety-critical activities.

Specific mission-critical deployments require separate technical, security, regulatory, and contractual arrangements.

23. Suspension

ANTELLAY Space may temporarily suspend access where reasonably necessary to:

- Protect security;
- Prevent abuse;
- Address a serious technical issue;
- Comply with law;
- Address non-payment;
- Investigate a material breach; or
- Protect ANTELLAY infrastructure or other customers.

Where reasonably practical, we will provide notice before suspension.

24. Termination

Either party may terminate a commercial agreement according to the termination provisions specified in the applicable Order Form or contract.

ANTELLAY Space may terminate or suspend access for material breach, unlawful use, security threats, or other circumstances permitted by the applicable agreement.

Upon termination, customer access may cease and handling of Customer Data will be governed by the applicable agreement and data-retention requirements.

25. Disclaimer

Except as expressly provided in a separate written agreement, services are provided on an “as is” and “as available” basis.

ANTELLAY Space does not guarantee that:

- Services will always be uninterrupted;
- Third-party data will always be accurate;
- AI outputs will always be correct;
- Predictions will accurately forecast future events; or
- Services will meet every specific customer requirement.

26. Limitation of Liability

To the maximum extent permitted by applicable law, ANTELLAY Labs will not be liable for indirect, incidental, special, consequential, or punitive damages arising from the use of the services.

For enterprise customers, liability limits may be specifically agreed in the applicable commercial contract.

Nothing in these Terms excludes liability that cannot legally be excluded.

27. Indemnification

Where applicable under the commercial agreement, each party may be responsible for claims arising from its breach of the agreement, unlawful conduct, or infringement of third-party rights.

Specific indemnification obligations may be defined in an Order Form, MSA, or other written agreement.

28. Force Majeure

ANTELLAY Space will not be responsible for delays or failures caused by circumstances beyond its reasonable control, including:

- Natural disasters;
- War;
- Government action;
- Internet or telecommunications failures;
- Cloud infrastructure failures;
- Cybersecurity incidents;
- Third-party provider failures;
- Power failures;

- Regulatory restrictions; or
- Other extraordinary events.

29. Governing Law

These SaaS Terms shall be governed by the laws of **India**.

Subject to the applicable commercial agreement and applicable law, disputes shall be subject to the jurisdiction of the competent courts in **Jaipur, Rajasthan, India**.

30. Changes to These SaaS Terms

ANTELLAY Space may update these Terms as its commercial services, technology, and legal requirements evolve.

Customers with existing commercial agreements may be governed by the version incorporated into their applicable agreement unless otherwise agreed.

31. Contact

API Terms of Use

Last Updated: 15 September 2026

These API Terms of Use (“API Terms”) govern access to and use of APIs, SDKs, developer tools, endpoints, documentation, data interfaces, and related integration services made available by **ANTELLAY Space**, operated by **ANTELLAY Labs** (“ANTELLAY”, “we”, “us”, or “our”).

By obtaining, accessing, or using an ANTELLAY Space API, you agree to these API Terms.

1. About the APIs

ANTELLAY Space APIs may provide access to technology and data services including:

- Satellite and orbital information;
- Space-object information;
- Earth observation data;
- Geospatial information;
- Space-weather information;
- Telemetry and telemetry-like datasets;
- AI-generated analysis;
- Predictive analytics;
- Simulation outputs;
- Monitoring information;
- SpaceOS functionality;
- Data processing services; and
- Other space-technology capabilities.

The exact functionality available to an API user depends on the applicable API, subscription, authorization, documentation, and commercial agreement.

2. API Access

API access may require:

- An approved account;
- API credentials;
- An API key;

- Authentication tokens;
- A subscription;
- Commercial approval;
- An enterprise agreement; or
- Other authorization from ANTELLAY Space.

API credentials are provided only to the authorized user or organization.

3. API Credentials

Users are responsible for protecting their API credentials.

You must not:

- Publicly expose API keys;
- Publish credentials in source-code repositories;
- Share credentials with unauthorized persons;
- Sell or transfer credentials;
- Circumvent authentication mechanisms; or
- Use another customer's credentials.

If credentials are compromised, the user should notify ANTELLAY Space promptly.

ANTELLAY Space may revoke or rotate compromised credentials.

4. Permitted Use

Subject to applicable limits, users may use the APIs for lawful purposes including:

- Software development;
- Research;
- Education;
- Data analysis;
- Space technology development;
- Business applications;
- Internal enterprise workflows;
- Authorized integrations;
- AI applications; and
- Other purposes permitted under the applicable service agreement.

5. Rate Limits and Usage Restrictions

ANTELLAY Space may apply:

- Requests-per-minute limits;
- Daily or monthly quotas;
- Data-volume limits;
- Concurrent-request limits;
- Storage limits;
- Geographic restrictions; or
- Other technical restrictions.

Users must not attempt to bypass or manipulate these limits.

Rate limits may differ between free, developer, commercial, and enterprise access.

6. API Documentation

API documentation may describe:

- Endpoints;
- Parameters;
- Authentication;
- Response formats;
- Usage limits;
- Data fields;
- Error codes;
- Versioning; and
- Integration requirements.

Documentation may be updated as the APIs evolve.

Users are responsible for reviewing applicable documentation before integrating an API into production systems.

7. API Data

API responses may contain or provide access to:

- Satellite data;
- Orbital data;
- Earth observation information;
- Space-weather information;
- Geospatial information;
- Telemetry;
- Third-party datasets;
- AI-generated information;
- Derived datasets; and

- Simulated or synthetic information.

Different datasets may be subject to different ownership, licensing, attribution, accuracy, and redistribution requirements.

8. Third-Party Data Sources

Some API data may originate from public, governmental, institutional, commercial, research, or other third-party sources.

ANTELLAY Space may process, transform, combine, analyze, or display such information where permitted.

Use of third-party data remains subject to applicable rights and restrictions.

9. Live and Near-Real-Time Data

Certain APIs may provide live or near-real-time information.

Such information may experience:

- Transmission delays;
- Processing delays;
- Provider delays;
- Missing data;
- Temporary interruptions;
- Revisions;
- Corrections;
- Synchronization differences; or
- Other technical limitations.

“Live” or “near-real-time” does not necessarily mean instantaneous or error-free.

10. API Output Accuracy

ANTELLAY Space makes reasonable efforts to provide reliable API services.

However, API output may contain errors or omissions.

Users should independently validate information before relying on it for significant technical, financial, operational, safety, or regulatory decisions.

11. AI-Generated API Output

Some APIs may generate outputs using artificial intelligence or machine-learning systems.

AI-generated outputs may include:

- Predictions;
- Recommendations;
- Classifications;
- Risk indicators;
- Forecasts;
- Anomaly detection;
- Summaries;
- Simulations; and
- Other analytical results.

AI-generated output may be inaccurate, incomplete, or unsuitable for a particular application.

Users remain responsible for evaluating and validating API output.

12. SpaceOS APIs

SpaceOS APIs may provide programmatic access to components of ANTELLAY Space's intelligence and operational software architecture.

Depending on the service, SpaceOS may integrate:

Monitor → Predict → Simulate → Recommend → Operate

Access to a SpaceOS API does not by itself mean that the API is connected to, controls, commands, or operates a satellite, spacecraft, launch vehicle, ground station, or other physical space infrastructure.

Any physical-system integration must be expressly authorized and governed by appropriate technical and contractual arrangements.

13. Prohibited API Activities

Users must not use ANTELLAY Space APIs to:

- Conduct unlawful activities;
- Attack or compromise systems;
- Circumvent authentication;
- Probe unauthorized systems;
- Perform denial-of-service attacks;
- Generate malicious traffic;
- Deploy malware;

- Abuse infrastructure;
- Interfere with third-party services;
- Harvest unauthorized personal information;
- Circumvent rate limits;
- Reverse engineer protected systems;
- Extract proprietary source code;
- Create unauthorized API replicas;
- Resell API access without authorization; or
- Facilitate unlawful interference with satellites or space infrastructure.

14. Automated Access

Automated API access is permitted only through authorized API mechanisms.

Users must not attempt to reproduce API functionality through unauthorized scraping, reverse engineering, endpoint discovery, or other methods designed to circumvent access controls.

15. Data Storage

Users may store API responses only to the extent permitted by the applicable API documentation, license, subscription, or commercial agreement.

Certain datasets may have retention, redistribution, attribution, or licensing restrictions.

16. Redistribution

API data must not be redistributed, sublicensed, published, sold, or made available to third parties where such activity is prohibited by the applicable data license or ANTELLAY agreement.

Enterprise redistribution rights must be expressly agreed in writing.

17. Attribution

Where attribution is required, users must provide attribution in the manner specified by ANTELLAY Space or the applicable third-party data provider.

Users must not remove required copyright, attribution, or licensing information.

18. Commercial Use

Commercial use of ANTELLAY Space APIs may require a paid plan or separate commercial agreement.

Examples include:

- Customer-facing applications;
- Commercial SaaS products;
- Enterprise systems;
- Paid data products;
- Resale;
- High-volume processing;
- Production integrations; and
- Commercial AI applications.

The applicable pricing and usage rights will be communicated through the relevant commercial arrangement.

19. Security

Users must implement reasonable security controls when integrating ANTELLAY Space APIs.

API credentials should be stored securely and should not be embedded in publicly accessible client-side applications where doing so would expose credentials.

Users must promptly report suspected security vulnerabilities or unauthorized access.

20. API Availability

ANTELLAY Space aims to maintain reliable API availability but does not guarantee uninterrupted access unless an applicable SLA expressly provides otherwise.

Availability may be affected by:

- Maintenance;
- Infrastructure failures;
- Third-party provider outages;
- Data-source interruptions;
- Security incidents;
- Network problems;
- Software updates; or
- Circumstances beyond reasonable control.

21. API Changes and Versioning

ANTELLAY Space may:

- Add endpoints;
- Modify functionality;
- Improve performance;
- Introduce new versions;
- Deprecate endpoints;
- Change response formats; or
- Remove outdated functionality.

Where reasonably practical, material breaking changes to production APIs may be communicated through applicable developer documentation or customer communications.

22. Experimental APIs

Some APIs may be released as beta, preview, experimental, research, or developer-preview services.

Such APIs may change without notice and may contain technical limitations.

Experimental APIs should not be used for mission-critical or safety-critical applications unless expressly approved under a separate agreement.

23. Intellectual Property

ANTELLAY Labs retains all rights in its proprietary:

- API technology;
- Software;
- Source code;
- Algorithms;
- AI systems;
- SpaceOS architecture;
- Documentation;
- Interfaces;
- Platform infrastructure; and
- Related intellectual property.

API access does not transfer ownership of ANTELLAY intellectual property.

24. User Applications

Users retain ownership of applications they independently develop using the APIs, subject to any rights relating to ANTELLAY technology, third-party data, or other incorporated materials.

Users are responsible for ensuring that their applications comply with applicable law and third-party rights.

25. Personal Information

Users must not submit personal information through an API unless the applicable service expressly permits such processing and the user has a lawful basis and required permissions.

Where applicable, additional data-processing terms may apply.

26. Monitoring and Abuse Prevention

ANTELLAY Space may monitor API usage for purposes including:

- Security;
- Reliability;
- Capacity management;
- Fraud prevention;
- Abuse detection;
- Rate-limit enforcement; and
- Service improvement.

Monitoring will be conducted subject to applicable law and the applicable privacy terms.

27. Suspension or Revocation

ANTELLAY Space may suspend or revoke API access where reasonably necessary because of:

- Security risks;
- Excessive usage;
- Abuse;
- Violation of these API Terms;
- Non-payment;
- Unauthorized access;
- Legal requirements; or
- Risks to ANTELLAY infrastructure or other users.

Where reasonably practical, notice may be provided before suspension.

28. No Mission-Critical Guarantee

Unless expressly agreed in writing, ANTELLAY Space APIs are not certified or represented as mission-critical systems.

API information must not be used as the sole basis for:

- Spacecraft safety decisions;
- Collision avoidance;
- Launch safety;
- Navigation safety;
- Life-critical systems;
- Emergency response; or
- Other safety-critical operations.

29. Third-Party Services

API functionality may depend on third-party:

- Data providers;
- Cloud infrastructure;
- Authentication services;
- Software libraries;
- AI models;
- Satellite data sources; or
- Other technology providers.

ANTELLAY Space is not responsible for third-party services outside its reasonable control.

30. Disclaimer

Except where expressly agreed otherwise, APIs are provided on an “as is” and “as available” basis.

ANTELLAY Space does not guarantee that API services or outputs will always be:

- Accurate;
- Complete;
- Current;
- Uninterrupted;
- Error-free; or
- Suitable for a particular purpose.

31. Limitation of Liability

To the maximum extent permitted by applicable law, ANTELLAY Labs will not be liable for indirect, incidental, special, consequential, or punitive damages arising from API use.

Any specific liability provisions agreed with an enterprise customer will be governed by the applicable commercial agreement.

Nothing in these Terms excludes liability that cannot legally be excluded.

32. Compliance

Users must comply with all applicable laws and regulations when using ANTELLAY Space APIs.

Users are responsible for determining whether their intended use requires specific licenses, approvals, permissions, or regulatory compliance.

33. Changes to API Terms

ANTELLAY Space may update these API Terms as its APIs, technology, services, and legal requirements evolve.

Continued use of the APIs after an applicable update constitutes acceptance of the revised Terms, subject to applicable law and contractual requirements.

34. Governing Law

These API Terms are governed by the laws of **India**.

Subject to applicable law and any separate commercial agreement, disputes shall be subject to the jurisdiction of the competent courts in **Jaipur, Rajasthan, India**.

Enterprise Terms

Last Updated: 15 September 2026

These Enterprise Terms (“Enterprise Terms”) govern the provision of enterprise-grade software, APIs, data services, AI systems, SpaceOS functionality, analytics, integrations, infrastructure, support, and related technology services provided by **ANTELLAY Space**, operated by **ANTELLAY Labs** (“ANTELLAY”, “we”, “us”, or “our”) to an enterprise customer (“Customer”, “you”, or “your”).

These Enterprise Terms are intended for organizations, businesses, institutions, research organizations, technology companies, satellite-sector participants, and other customers entering into a commercial relationship with ANTELLAY Space.

1. Enterprise Services

ANTELLAY Space may provide enterprise customers with services including:

- SpaceOS;

- Satellite intelligence platforms;
- Orbital intelligence;
- Space-data APIs;
- Earth observation data services;
- Space-weather data;
- AI and machine-learning systems;
- Predictive analytics;
- Simulation environments;
- Monitoring dashboards;
- Data processing;
- Enterprise integrations;
- Custom software;
- Cloud-based platforms;
- Technical consulting; and
- Other space-technology services.

The exact services provided will be described in the applicable **Master Services Agreement (“MSA”)**, Order Form, Statement of Work (“SOW”), Proposal, or other written agreement.

2. Order Forms

Each enterprise engagement may be documented through an Order Form specifying:

- Services;
- Subscription or project period;
- Authorized users;
- Data access;
- API usage;
- Fees;
- Payment terms;
- Support;
- Service levels;
- Deployment requirements;
- Deliverables; and
- Other commercial conditions.

The Order Form forms part of the agreement between ANTELLAY Space and the Customer.

3. Master Services Agreement

For larger or continuing engagements, ANTELLAY Space may enter into an MSA with the Customer.

The MSA may establish general contractual terms covering multiple Order Forms, projects, products, or services.

Where a conflict exists, the applicable contractual documents will govern according to their agreed order of precedence.

4. Customer Onboarding

Enterprise onboarding may include:

- Account creation;
- User provisioning;
- Technical configuration;
- API credential issuance;
- Data-source configuration;
- Integration planning;
- Security review;
- Environment setup;
- Training; and
- Technical documentation.

Additional onboarding requirements may apply to specific deployments.

5. Authorized Users

The Customer may authorize employees, contractors, consultants, or other approved representatives to use the applicable services.

The Customer is responsible for ensuring that Authorized Users comply with the applicable agreement.

User limits and access rights may be defined in the relevant Order Form.

6. Enterprise Environment

Depending on the service, ANTELLAY Space may provide:

- Shared cloud environments;
- Dedicated environments;
- Private infrastructure;
- Isolated databases;
- Enterprise API access;
- Custom deployments; or

- Other architecture.

The applicable environment will depend on the Customer's requirements and agreed service configuration.

7. Customer Data

Customer Data includes information, files, datasets, telemetry, configurations, documents, business information, technical information, and other content provided by the Customer.

The Customer retains ownership of its Customer Data.

ANTELLAY Space receives only the rights reasonably necessary to provide the contracted services.

8. Customer Data Processing

ANTELLAY Space may process Customer Data to:

- Provide contracted services;
- Operate the platform;
- Provide technical support;
- Maintain security;
- Monitor performance;
- Prevent abuse;
- Troubleshoot technical issues; and
- Comply with applicable law.

Additional processing requirements may be documented in a **Data Processing Agreement (“DPA”)**.

9. Customer Responsibilities

The Customer is responsible for:

- The legality of Customer Data;
- Obtaining required permissions;
- Maintaining appropriate access controls;
- Configuring its systems correctly;
- Protecting credentials;
- Maintaining required backups; and
- Ensuring that its use of ANTELLAY services complies with applicable law.

10. Data Sources

Enterprise services may incorporate data from:

- Public datasets;
- Government sources;
- Research institutions;
- Satellite data providers;
- Commercial data providers;
- Third-party APIs;
- Licensed datasets;
- Customer-provided data;
- Partner data; and
- ANTELLAY-generated or derived data.

The rights and restrictions associated with each data source may vary.

11. Live and Near-Real-Time Data

Certain enterprise services may provide live or near-real-time satellite, orbital, geospatial, Earth observation, space-weather, telemetry, or related information.

The availability and timing of such data may depend on external sources and infrastructure.

Data may experience delays, interruptions, revisions, or corrections.

12. AI and SpaceOS

Enterprise services may incorporate AI, machine learning, simulations, predictive systems, automated analytics, and SpaceOS functionality.

Possible functionality may include:

Monitor → Predict → Simulate → Recommend → Operate

AI and SpaceOS outputs are generally intended to support human decision-making unless a specific written agreement expressly defines another operational purpose.

13. No Assumption of Physical Control

Access to SpaceOS, APIs, dashboards, or other ANTELLAY technology does not automatically mean that ANTELLAY Space has access to or control over:

- Satellites;
- Spacecraft;
- Launch vehicles;
- Ground stations;
- Communication systems;
- Navigation systems; or
- Other physical infrastructure.

Any physical-system integration must be expressly authorized, technically implemented, and contractually documented.

14. Custom Development

Enterprise customers may request customized functionality.

Custom projects may include:

- Software development;
- API integrations;
- Data pipelines;
- AI models;
- Dashboards;
- Analytics systems;
- Simulation environments;
- Workflow automation; and
- Other technology development.

Deliverables, timelines, acceptance criteria, fees, and intellectual-property rights for custom work should be specified in the applicable SOW or Order Form.

15. Intellectual Property

Unless otherwise agreed in writing, ANTELLAY Labs retains ownership of its pre-existing and independently developed:

- Software;
- Source code;
- Algorithms;
- AI models;
- Machine-learning systems;
- SpaceOS architecture;
- APIs;
- Interfaces;
- Documentation;

- Platform infrastructure;
- Proprietary methodologies; and
- Other intellectual property.

A Customer does not obtain ownership merely by purchasing or using an enterprise service.

16. Custom Deliverables

Ownership or licensing of custom deliverables will be determined by the applicable SOW or commercial agreement.

Unless expressly transferred in writing, ANTELLAY retains ownership of its underlying technology, reusable components, frameworks, algorithms, tools, models, and know-how.

17. Third-Party Technology

ANTELLAY Space may use third-party technology and infrastructure including:

- Cloud platforms;
- APIs;
- AI models;
- Data providers;
- Security services;
- Software libraries; and
- Other technology providers.

Third-party components may be subject to separate terms and licensing conditions.

18. Security

ANTELLAY Space will maintain reasonable technical and organizational security measures appropriate to the applicable service.

Depending on the engagement, security measures may include:

- Authentication;
- Access controls;
- Encryption;
- Logging;
- Monitoring;
- Backup procedures;
- Infrastructure protection; and
- Security incident response processes.

Specific security requirements may be agreed separately with enterprise customers.

19. Security Assessments

Enterprise customers may request reasonable information concerning ANTELLAY Space security practices, subject to confidentiality, security, and operational limitations.

Security assessments, questionnaires, audits, or penetration-testing requirements may be addressed through separate written arrangements.

20. Security Incidents

If ANTELLAY Space becomes aware of a security incident materially affecting Customer Data, it will take reasonable steps to investigate, contain, and address the incident.

Notification procedures may be defined in the applicable DPA, MSA, or security agreement.

21. Confidentiality

Each party may receive confidential information from the other party.

Each party agrees to:

- Protect confidential information;
- Use it only for authorized business purposes;
- Restrict access to persons who need to know; and
- Prevent unauthorized disclosure.

Confidentiality obligations do not apply to information that is publicly available, independently developed, lawfully obtained from another source, or required to be disclosed by law.

22. Service Levels

Enterprise customers may receive a separate **Service Level Agreement (“SLA”)**.

An SLA may specify:

- Availability targets;
- Support response times;
- Maintenance windows;
- Incident priorities;
- Service credits; and
- Other service commitments.

No specific uptime or response-time commitment applies unless expressly agreed in writing.

23. Support

Enterprise support may include:

- Technical assistance;
- Account support;
- Incident management;
- Integration support;
- Documentation;
- Troubleshooting; and
- Product guidance.

The scope and availability of support will depend on the applicable service plan or agreement.

24. Maintenance

ANTELLAY Space may perform scheduled or emergency maintenance.

Where reasonably practical, planned maintenance will be communicated in advance.

Emergency maintenance may occur without advance notice where necessary to protect security, infrastructure, or service integrity.

25. Business Continuity

ANTELLAY Space may maintain reasonable business-continuity and recovery measures appropriate to its services.

Recovery objectives, backup requirements, and disaster-recovery commitments may be defined separately for enterprise customers.

26. Regulatory Compliance

Each party is responsible for complying with laws and regulations applicable to its own activities.

Enterprise customers are responsible for determining whether their intended use of ANTELLAY Space services requires:

- Government approvals;
- Sector-specific licenses;
- Data permissions;

- Export or import permissions;
- Security approvals;
- Space-sector authorizations; or
- Other regulatory requirements.

ANTELLAY Space does not provide regulatory approval merely by providing software or data services.

27. Responsible Use of Space Technology

Customers must not use ANTELLAY Space services to facilitate unlawful interference with:

- Satellites;
- Spacecraft;
- Ground stations;
- Communication systems;
- Navigation systems;
- Launch infrastructure; or
- Other space infrastructure.

Customers must comply with the applicable Acceptable Use Policy.

28. Mission-Critical Deployments

Unless expressly agreed under a dedicated contract, enterprise services are not certified as safety-critical or mission-critical systems.

Any deployment intended for mission-critical use should undergo appropriate:

- Technical validation;
- Security assessment;
- Human-oversight design;
- Reliability testing;
- Regulatory review; and
- Contractual approval.

29. Customer Integrations

Customers are responsible for systems they connect to ANTELLAY Space services.

ANTELLAY Space is not responsible for failures caused by improperly configured customer systems, unauthorized integrations, or third-party systems outside ANTELLAY's control.

30. Pricing and Payment

Enterprise pricing will be specified in the applicable commercial agreement.

Payment terms may include:

- Subscription fees;
- Project fees;
- Usage-based fees;
- API charges;
- Implementation fees;
- Support fees; or
- Other agreed charges.

Applicable taxes may be charged separately.

31. Suspension

ANTELLAY Space may suspend services where reasonably necessary because of:

- Security threats;
- Serious contractual breach;
- Unlawful use;
- Unauthorized access;
- Non-payment;
- Excessive or abusive usage;
- Legal requirements; or
- Risks to the platform or other customers.

Where reasonably practical, ANTELLAY Space will provide notice and an opportunity to address the issue.

32. Termination

Termination rights will be governed by the applicable MSA, Order Form, SOW, or other written agreement.

Upon termination:

- Customer access may cease;
- API credentials may be revoked;
- Services may be disabled;
- Customer Data may be returned or deleted according to the applicable agreement; and
- Outstanding payment obligations may remain due.

33. Data Return and Deletion

Where applicable, ANTELLAY Space may provide reasonable mechanisms for Customer Data export following termination.

Data retention and deletion will be subject to:

- The applicable contract;
- Technical limitations;
- Legal obligations;
- Security requirements; and
- Backup-retention procedures.

34. Warranties

Any specific warranties relating to enterprise services must be expressly stated in the applicable commercial agreement.

Except as expressly agreed, services are provided on an “as is” and “as available” basis.

35. Disclaimer

ANTELLAY Space does not guarantee that:

- Services will always be uninterrupted;
- External data will always be accurate;
- AI outputs will always be correct;
- Predictions will always be accurate;
- Third-party services will remain available; or
- Services will satisfy every particular business requirement.

36. Limitation of Liability

To the maximum extent permitted by applicable law, neither party will be liable for indirect, incidental, special, consequential, or punitive damages arising from the applicable services or agreement.

Enterprise-specific liability limits, exclusions, and indemnification obligations should be defined in the applicable MSA.

Nothing in these Terms excludes liability that cannot legally be excluded.

37. Indemnification

Where agreed in the applicable commercial contract, each party may be responsible for certain third-party claims resulting from its:

- Breach of contract;
- Unlawful conduct;
- Gross negligence or willful misconduct; or
- Infringement of third-party intellectual-property rights.

The precise scope of indemnification will be governed by the applicable MSA or other written agreement.

38. Force Majeure

Neither party will be responsible for delays or failures caused by circumstances beyond its reasonable control, including:

- Natural disasters;
- War;
- Government action;
- Internet failures;
- Cloud outages;
- Cybersecurity incidents;
- Telecommunications failures;
- Third-party provider failures;
- Power failures; or
- Other extraordinary events.

39. Publicity and Use of Customer Name

ANTELLAY Space will not publicly use a Customer's name, logo, trademarks, case studies, or relationship details for marketing purposes without appropriate authorization, unless otherwise agreed in writing.

40. Non-Solicitation

Where applicable, the parties may agree to specific employee or contractor non-solicitation provisions in the applicable MSA.

No such restriction will apply unless expressly agreed in writing.

41. Assignment

Neither party may transfer the applicable commercial agreement in a manner that materially affects the other party's rights without appropriate consent, except where permitted under the agreement or applicable law.

42. Governing Law

These Enterprise Terms are governed by the laws of **India**.

Unless a separate enterprise agreement provides otherwise, disputes shall be subject to the jurisdiction of the competent courts in **Jaipur, Rajasthan, India**.

43. Order of Precedence

Where applicable, the following order may apply in the event of inconsistency:

1. Signed MSA;
2. Applicable Order Form;
3. Statement of Work;
4. Data Processing Agreement;
5. Service Level Agreement;
6. Enterprise Terms;
7. API Terms of Use; and
8. Other referenced policies.

The actual order of precedence should be confirmed in the executed commercial agreement.

44. Changes

ANTELLAY Space may update these Enterprise Terms from time to time.

For customers operating under a signed MSA or other commercial agreement, contractual changes will be governed by the modification provisions of that agreement.

45. Contact

For enterprise partnerships, SpaceOS deployments, institutional projects, APIs, custom technology, or commercial agreements:

Security & Responsible Disclosure Policy

Last Updated: 15 September 2026

ANTELLAY Space, operated by **ANTELLAY Labs** (“ANTELLAY”, “we”, “us”, or “our”), is committed to protecting the security, reliability, and integrity of its websites, applications, APIs, data systems, cloud infrastructure, and technology platforms.

This Security & Responsible Disclosure Policy explains how security researchers, customers, developers, partners, and other individuals can responsibly report suspected security vulnerabilities affecting ANTELLAY Space.

1. Scope

This policy applies to publicly accessible ANTELLAY Space technology and infrastructure, including where applicable:

- ANTELLAY Space websites;
- SpaceOS interfaces;
- APIs;
- Developer services;
- Authentication systems;
- Cloud-hosted applications;
- Data platforms;
- Dashboards;
- Public software interfaces; and

- Other ANTELLAY Space systems specifically identified as being within scope.

Systems operated entirely by third parties are generally outside the scope of this policy.

2. Security Commitment

ANTELLAY Space aims to maintain reasonable security practices appropriate to the nature of its technology and services.

Security measures may include:

- Access controls;
- Authentication;
- Encryption;
- Security monitoring;
- Logging;
- Vulnerability management;
- Infrastructure protection;
- Secure development practices; and
- Incident-response procedures.

Security controls may evolve as ANTELLAY Space technology develops.

3. Responsible Disclosure

We encourage responsible security research.

If you identify a potential vulnerability, please report it to us before publicly disclosing the issue.

A responsible report helps ANTELLAY Space investigate and resolve the issue while reducing potential risk to users and infrastructure.

4. How to Report a Vulnerability

Security vulnerabilities should be reported to:

Email: space@antellay.com

A useful report should include, where reasonably possible:

- Description of the vulnerability;
- Affected URL, API, service, or component;
- Steps required to reproduce the issue;
- Proof of concept;

- Potential security impact;
- Relevant screenshots or logs;
- Your contact information; and
- Any other information necessary to reproduce and understand the issue.

Please do not include unnecessary personal or confidential information in a report.

5. Responsible Testing

Security researchers should:

- Test only systems they are authorized to test;
- Avoid accessing unnecessary data;
- Minimize impact on systems;
- Avoid disrupting services;
- Stop testing after confirming a vulnerability;
- Protect any information discovered during testing; and
- Provide sufficient information for ANTELLAY Space to reproduce the issue.

6. Prohibited Testing

Security testing must not involve:

- Denial-of-service attacks;
- Distributed denial-of-service attacks;
- Destructive testing;
- Malware deployment;
- Ransomware;
- Data destruction;
- Unauthorized persistence;
- Social engineering of employees or users;
- Physical attacks;
- Attacks against third-party infrastructure;
- Spam or mass messaging;
- Credential theft;
- Extortion; or
- Any activity that creates significant operational risk.

7. Personal and Confidential Data

Researchers must not intentionally access, copy, modify, download, disclose, or retain personal information or confidential customer information that is not necessary to demonstrate a vulnerability.

If such information is accidentally accessed, stop testing and notify ANTELLAY Space promptly.

Any such information should be handled securely and deleted when no longer necessary.

8. Third-Party Systems

ANTELLAY Space may depend on third-party:

- Cloud infrastructure;
- APIs;
- Satellite-data providers;
- Authentication systems;
- Software libraries;
- AI services;
- Data providers; and
- Other technology services.

A vulnerability existing entirely within a third-party system should generally be reported to the relevant provider.

Researchers should not attack third-party systems through ANTELLAY Space infrastructure.

9. Satellite and Space Infrastructure

ANTELLAY Space may process or display satellite, orbital, Earth observation, space-weather, geospatial, telemetry, or related information.

This policy does **not** authorize anyone to attempt to access, interfere with, manipulate, command, disrupt, or compromise:

- Satellites;
- Spacecraft;
- Ground stations;
- Communication systems;
- Navigation systems;
- Launch systems; or
- Other physical space infrastructure.

Access to ANTELLAY Space software, APIs, or SpaceOS interfaces does not constitute authorization to access or interfere with physical space systems.

10. SpaceOS Security

SpaceOS may incorporate multiple software, data, AI, cloud, API, and analytical components.

Security researchers may report vulnerabilities affecting authorized SpaceOS interfaces and infrastructure.

Researchers must not attempt to obtain unauthorized access to physical spacecraft or other external infrastructure through SpaceOS or any related interface.

11. AI and Model Security

Where ANTELLAY Space uses AI or machine-learning technologies, researchers may identify issues such as:

- Unauthorized model access;
- Prompt injection;
- Data leakage;
- Access-control failures;
- Model/API authentication weaknesses;
- Improper isolation; or
- Other security vulnerabilities.

Testing must remain within authorized systems and must not intentionally expose confidential information or disrupt services.

12. Rate Limiting and Automated Testing

Automated testing must be performed cautiously.

Researchers should avoid generating excessive traffic or attempting to bypass rate limits.

Where a vulnerability can be demonstrated without high-volume requests, researchers should use the minimum traffic necessary.

13. Credential and Authentication Testing

Researchers must not use stolen, leaked, purchased, or unauthorized credentials to access ANTELLAY Space systems.

If exposed credentials are discovered accidentally, report them to ANTELLAY Space without attempting to use them beyond what is reasonably necessary to establish the security issue.

14. Vulnerability Severity

ANTELLAY Space may assess reported vulnerabilities based on factors including:

- Exploitability;
- Potential impact;
- Authentication requirements;
- Data exposure;
- Privilege level;
- Availability impact;
- Scope of affected systems; and
- Likelihood of exploitation.

Severity classifications may be based on generally recognized security practices.

15. Report Handling

After receiving a report, ANTELLAY Space may:

1. Acknowledge receipt;
2. Validate the vulnerability;
3. Assess its severity;
4. Investigate affected systems;
5. Develop and deploy a remediation;
6. Request additional information; and
7. Close the report when appropriate.

Response times may vary depending on complexity and severity.

16. Good-Faith Research

ANTELLAY Space appreciates security research conducted in good faith.

Where a researcher follows this policy, avoids harmful activity, and provides a responsible disclosure, ANTELLAY Space will consider the circumstances of the research when evaluating the reported activity.

This policy does not provide immunity from legal requirements or obligations.

17. Public Disclosure

Researchers should not publicly disclose a vulnerability before allowing ANTELLAY Space reasonable time to investigate and address the issue.

Coordinated disclosure timelines may be discussed between the researcher and ANTELLAY Space.

ANTELLAY Space may independently determine when and how information concerning a security issue is disclosed.

18. Bug Bounty

Unless expressly announced by ANTELLAY Space, this policy does **not** constitute a bug-bounty program and does not create an obligation to provide monetary rewards, compensation, employment, recognition, or other benefits.

If ANTELLAY Space establishes a formal bug-bounty program in the future, that program may have separate rules and eligibility requirements.

19. Security Incident Reporting

Suspected security incidents involving ANTELLAY Space systems should be reported promptly to:

space@antellay.com

Reports may include:

- Unauthorized access;
- Exposed credentials;
- Data leakage;
- Malware;
- Account compromise;
- Suspicious activity;
- API abuse;
- Infrastructure compromise; or
- Other suspected security incidents.

20. Customer Security Incidents

Enterprise customers may have additional incident-reporting and notification obligations under their applicable:

- Master Services Agreement;
- Data Processing Agreement;
- Service Level Agreement; or
- Other contractual documentation.

Where contractual requirements apply, those requirements will govern.

21. Security of Customer Data

ANTELLAY Space will take reasonable measures to protect Customer Data handled through its services.

Customers are also responsible for:

- Protecting credentials;
- Managing authorized users;
- Configuring integrations securely;
- Maintaining appropriate internal controls; and
- Reporting suspected compromises.

22. Security Research Documentation

ANTELLAY Space may maintain internal records relating to reported vulnerabilities and security incidents for purposes including:

- Investigation;
- Remediation;
- Risk management;
- Compliance;
- Security improvement; and
- Future prevention.

Information will be handled subject to applicable confidentiality and privacy requirements.

23. No Authorization for Unauthorized Access

Nothing in this policy grants permission to:

- Access systems without authorization;
- Bypass security controls;
- Access restricted data;
- Interfere with infrastructure;
- Attack third-party systems; or
- Conduct unlawful security activity.

Researchers must operate within the scope of systems and activities they are authorized to test.

24. Changes to This Policy

ANTELLAY Space may update this Security & Responsible Disclosure Policy as its infrastructure, technology, security practices, and legal requirements evolve.

The latest published version will govern responsible disclosure activities undertaken after the effective update.

Data Processing Agreement (DPA)

Last Updated: 15 September 2026

This Data Processing Agreement (“DPA”) forms part of the applicable agreement between **ANTELLAY Space**, operated by **ANTELLAY Labs** (“ANTELLAY”, “we”, “us”, or “our”), and the customer or organization receiving ANTELLAY Space services (“Customer”, “you”, or “your”).

This DPA applies where ANTELLAY Space processes personal data on behalf of the Customer in connection with applicable software, SaaS, API, SpaceOS, analytics, cloud, data-processing, or other technology services.

1. Purpose

This DPA establishes the responsibilities of the parties concerning the processing and protection of personal data handled through ANTELLAY Space services.

The parties intend to process personal data in accordance with applicable data-protection and privacy laws.

2. Definitions

For this DPA:

“Personal Data” means information relating to an identified or identifiable individual, as defined under applicable law.

“Processing” includes collecting, recording, organizing, storing, accessing, analyzing, modifying, retrieving, transmitting, or deleting Personal Data.

“Controller” or equivalent terminology means the party that determines the purposes and means of processing where applicable law uses such terminology.

“Processor” or equivalent terminology means a party processing Personal Data on behalf of another party where applicable law uses such terminology.

“Subprocessor” means a third party engaged by ANTELLAY Space to process Personal Data on behalf of the Customer.

3. Roles of the Parties

For Personal Data processed by ANTELLAY Space on behalf of the Customer:

- The Customer generally acts as the Controller or equivalent responsible entity.
- ANTELLAY Space generally acts as the Processor or equivalent service provider.

The actual roles may depend on the nature and purpose of a particular processing activity and applicable law.

Where ANTELLAY processes information for its own independent purposes, ANTELLAY may act as an independent Controller or equivalent entity for that processing.

4. Customer Instructions

ANTELLAY Space will process Customer Personal Data according to:

- The Customer's documented instructions;
- The applicable service agreement;
- The applicable Order Form or SOW;
- This DPA; and
- Applicable law.

ANTELLAY Space will not intentionally process Customer Personal Data for purposes unrelated to the contracted services except where permitted or required by law.

5. Customer Responsibilities

The Customer is responsible for:

- Establishing a lawful basis for processing;
- Providing appropriate privacy notices;
- Obtaining required consents where applicable;
- Providing lawful instructions;
- Ensuring data accuracy where applicable;
- Respecting data-subject rights; and
- Ensuring that Personal Data submitted to ANTELLAY Space may lawfully be processed.

6. Categories of Personal Data

Depending on the service, Customer Personal Data may include:

- Names;
- Email addresses;
- Telephone numbers;
- Business contact information;
- Job titles;
- Account information;
- User identifiers;
- Login and authentication information;
- Technical identifiers;
- IP addresses;
- Usage information;
- Customer-provided documents; and
- Other Personal Data submitted by the Customer.

The Customer should not submit sensitive or highly regulated information unless the applicable service and agreement expressly support such processing.

7. Categories of Data Subjects

Depending on the Customer's use of the services, Personal Data may relate to:

- Employees;
- Contractors;
- Customers;
- Users;
- Business contacts;
- Partners;
- Suppliers; and
- Other individuals whose data is lawfully provided by the Customer.

8. Processing Activities

ANTELLAY Space may process Personal Data for purposes including:

- Providing the contracted service;
- Account management;
- Authentication;
- Customer support;
- Technical operations;
- Security monitoring;
- Troubleshooting;
- Service administration;
- Performance monitoring;
- Backup and recovery;
- Abuse prevention; and
- Compliance with legal obligations.

9. Confidentiality

ANTELLAY Space will ensure that personnel authorized to process Customer Personal Data are subject to appropriate confidentiality obligations.

Access to Personal Data will be limited to personnel and service providers who reasonably require access for authorized purposes.

10. Security Measures

ANTELLAY Space will implement reasonable technical and organizational measures appropriate to the nature and risks of the processing.

Depending on the service, measures may include:

- Access controls;
- Authentication;
- Encryption;
- Secure transmission;
- Logging;
- Monitoring;
- Backup procedures;
- Infrastructure protection;
- Vulnerability management;
- Security testing; and
- Incident-response procedures.

Security measures may evolve as technology and risks change.

11. Data Breach and Security Incidents

If ANTELLAY Space becomes aware of a security incident involving Customer Personal Data, it will take reasonable steps to:

1. Investigate the incident;
2. Contain and mitigate the impact;
3. Assess relevant risks; and
4. Notify the Customer where required by applicable law or contract.

The Customer remains responsible for determining whether it must notify regulators, affected individuals, or other parties.

12. Subprocessors

ANTELLAY Space may use third-party service providers to support its services.

These may include providers of:

- Cloud infrastructure;
- Hosting;
- Security;
- Analytics;
- Communications;
- Storage;

- Authentication;
- Monitoring; and
- Other technology services.

ANTELLAY Space will require relevant service providers to maintain appropriate confidentiality and data-protection obligations appropriate to their role.

13. Third-Party Data Services

ANTELLAY Space may use third-party APIs and data services to provide functionality.

Satellite, orbital, Earth observation, geospatial, space-weather, telemetry, and other technical datasets are not automatically considered Customer Personal Data merely because they are processed through the platform.

14. International Data Transfers

Personal Data may be processed or stored in jurisdictions outside the Customer's location where necessary to provide the services.

Where applicable law imposes requirements on international transfers, the parties will implement appropriate safeguards or contractual mechanisms.

15. Data Subject Rights

Where applicable, the Customer may request assistance from ANTELLAY Space in responding to lawful requests from individuals concerning:

- Access;
- Correction;
- Deletion;
- Restriction;
- Objection;
- Portability; or
- Other applicable data rights.

ANTELLAY Space may charge reasonable costs for extraordinary assistance where permitted by the applicable agreement.

16. Direct Requests

If an individual directly contacts ANTELLAY Space concerning Personal Data controlled by the Customer, ANTELLAY Space may direct the individual to the Customer where appropriate.

ANTELLAY Space will provide reasonable assistance where required by applicable law.

17. Data Retention

ANTELLAY Space will retain Customer Personal Data for the period reasonably necessary to provide the contracted services, comply with contractual requirements, maintain security, and satisfy applicable legal obligations.

Specific retention periods may be defined in the applicable agreement.

18. Data Deletion or Return

Following termination of the applicable service, ANTELLAY Space will, subject to the Customer's instructions and applicable law:

- Return Customer Personal Data where technically and contractually appropriate; or
- Delete Customer Personal Data.

Copies may remain temporarily in backups or archives until securely overwritten in accordance with applicable retention procedures.

19. Customer Data Backups

Customers remain responsible for maintaining appropriate copies of their own data where necessary.

ANTELLAY Space may maintain backups for service continuity and security purposes, but backup availability does not necessarily constitute a customer-controlled backup service unless expressly agreed.

20. Data Accuracy

The Customer is generally responsible for the accuracy, legality, and relevance of Personal Data submitted to ANTELLAY Space.

ANTELLAY Space is not responsible for inaccurate information supplied by the Customer.

21. Data Minimization

Customers should provide only the Personal Data reasonably necessary for the intended service.

Customers should avoid uploading unnecessary sensitive, confidential, or regulated information.

22. Sensitive Personal Data

Customers must not submit sensitive Personal Data unless:

- The applicable service supports it;
- The Customer has a lawful basis;
- Appropriate safeguards are in place; and
- The parties have agreed to any additional requirements where necessary.

Certain categories of data may require enhanced contractual or technical controls.

23. Children's Data

Customers should not submit children's Personal Data unless the applicable service and contractual arrangement expressly permit such processing and the Customer has complied with applicable legal requirements.

24. Compliance Assistance

Where reasonably necessary and subject to the applicable agreement, ANTELLAY Space may provide information reasonably available to it to assist the Customer with:

- Data-protection assessments;
- Security reviews;
- Regulatory inquiries;
- Data-subject requests;
- Security incident investigations; and
- Other reasonable compliance obligations.

25. Audits

Enterprise customers may request reasonable information concerning ANTELLAY Space's data-protection and security practices.

Any formal audit, inspection, or assessment must:

- Be reasonably scoped;
- Respect confidentiality;
- Avoid disruption of services;
- Protect information concerning other customers; and
- Comply with applicable security requirements.

Specific audit rights may be defined in the applicable MSA.

26. Government and Legal Requests

ANTELLAY Space may disclose Personal Data where required by:

- Applicable law;
- Court order;
- Government authority;
- Regulatory requirement; or
- Other legally binding process.

Where legally permitted, ANTELLAY Space may notify the Customer of such requests.

27. Customer Security Responsibilities

The Customer is responsible for:

- Account security;
- User access;
- Passwords and credentials;
- API keys;
- Endpoint security;
- Internal access controls; and
- Secure configuration of integrations.

ANTELLAY Space is not responsible for security failures caused by the Customer's own systems or unauthorized users.

28. AI and Personal Data

Where ANTELLAY Space services use AI or machine-learning systems, Personal Data may be processed only as permitted by the applicable service, agreement, and law.

Customers should not submit Personal Data to AI features unless the relevant functionality expressly permits such use.

Any additional AI-processing conditions may be documented separately.

29. Analytics and Service Improvement

ANTELLAY Space may process technical and usage information for security, reliability, diagnostics, and service improvement, subject to applicable law and the relevant privacy terms.

Customer Personal Data will not be used for unrelated purposes merely because it is processed through an enterprise service.

30. Data Protection Contact

Questions concerning this DPA or data-protection matters may be directed to:

space@antellay.com

Customers may include sufficient information to identify the relevant service and processing activity.

31. Precedence

If this DPA conflicts with another agreement concerning the processing of Personal Data, the parties will apply the agreed contractual order of precedence.

Where applicable, the signed MSA or Order Form may contain additional data-protection requirements.

32. Term

This DPA remains

Cookie Policy

Last Updated: 15 September 2026

This Cookie Policy explains how **ANTELLAY Space**, operated by **ANTELLAY Labs** (“ANTELLAY”, “we”, “us”, or “our”), may use cookies and similar technologies when you visit or interact with our website, applications, dashboards, APIs, and related online services.

This Cookie Policy should be read together with our **Privacy Policy** and **Terms & Conditions**.

1. What Are Cookies?

Cookies are small text files that may be stored on your device when you visit a website.

Cookies can help websites:

- Function correctly;
- Remember preferences;
- Maintain sessions;
- Understand website usage;
- Improve performance;
- Protect against abuse; and
- Provide relevant functionality.

Other technologies such as pixels, local storage, SDKs, tags, and similar identifiers may perform functions similar to cookies.

2. How ANTELLAY Space May Use Cookies

ANTELLAY Space may use cookies and similar technologies for purposes including:

- Essential website functionality;

- Authentication and session management;
- Security;
- User preferences;
- Website performance;
- Analytics;
- Error monitoring;
- Understanding how visitors interact with the website; and
- Improving our products and services.

The exact technologies used may change as the website develops.

3. Types of Cookies

3.1 Strictly Necessary Cookies

These cookies may be required for the website or application to function.

They may support:

- Authentication;
- Security;
- Session management;
- Load balancing;
- Basic navigation; and
- Other essential functionality.

Because these technologies may be necessary for service operation, they may not always be disabled through a website preference mechanism.

3.2 Functional Cookies

Functional technologies may remember choices such as:

- Language;
- Interface preferences;
- Session preferences; and
- Other user settings.

These technologies help provide a more personalized experience.

3.3 Analytics Cookies

Analytics technologies may help us understand:

- Which pages are visited;

- How visitors navigate the website;
- General usage patterns;
- Performance issues;
- Traffic sources; and
- Website engagement.

Analytics information may be collected in aggregated or pseudonymized forms depending on the technology used.

3.4 Security Technologies

Cookies and similar technologies may be used to:

- Detect suspicious activity;
- Prevent abuse;
- Protect accounts;
- Identify automated attacks; and
- Maintain platform security.

3.5 Preference Technologies

These technologies may allow the website to remember visitor preferences and improve usability.

4. Third-Party Technologies

ANTELLAY Space may use third-party services that place or access cookies or similar technologies.

These services may include providers for:

- Website analytics;
- Hosting;
- Security;
- Performance monitoring;
- Authentication;
- Communications; and
- Other website functionality.

Third-party providers may have their own privacy and cookie policies.

5. Cookies and Personal Data

Cookies do not necessarily identify an individual directly.

However, information collected through cookies or similar technologies may sometimes be associated with other information that can identify a person.

Where applicable, such information will be handled according to our **Privacy Policy** and applicable data-protection laws.

6. Managing Cookies

Depending on your browser, device, and location, you may be able to:

- Block cookies;
- Delete stored cookies;
- Restrict third-party cookies;
- Receive notifications when cookies are used; or
- Change browser privacy settings.

Disabling certain cookies may affect website functionality.

7. Browser Controls

Most modern browsers provide controls for managing cookies.

Browser settings may allow you to delete existing cookies or prevent future cookies from being stored.

The exact controls depend on the browser and device you use.

8. Cookie Preferences

Where required by applicable law, ANTELLAY Space may provide a cookie-consent or preference mechanism allowing visitors to manage non-essential cookies.

Available choices may vary depending on the visitor's jurisdiction and the technologies active on the website.

9. Local Storage and Similar Technologies

ANTELLAY Space may use technologies such as:

- Local storage;
- Session storage;
- Pixels;
- Web beacons;

- SDKs;
- Tags; and
- Similar technologies.

These technologies may serve purposes similar to cookies, including authentication, preferences, analytics, security, and performance.

10. Cookies in Applications and Dashboards

ANTELLAY Space applications, SpaceOS interfaces, dashboards, or authenticated services may use session technologies to maintain secure user access and functionality.

Such technologies may differ from those used on the public website.

11. API Services

APIs generally operate through programmatic requests rather than traditional browser cookies.

However, authentication, security, documentation portals, developer dashboards, or related services may use cookies or similar technologies.

12. Security

Cookies and similar technologies may be used as part of security controls.

Users should not attempt to modify, bypass, or interfere with security-related cookies, tokens, authentication mechanisms, or other technical controls.

13. Retention

Different cookies and technologies may remain on a device for different periods.

Some are deleted when a browser session ends, while others may remain until they expire or are manually deleted.

Retention periods may vary according to the purpose and provider.

14. Changes to Cookies

The technologies used by ANTELLAY Space may change over time.

We may add, remove, replace, or modify cookies and similar technologies as our website, applications, analytics requirements, security systems, and services evolve.

15. International Visitors

ANTELLAY Space may be accessed by users from different countries.

Cookie practices and consent requirements may differ by jurisdiction.

Where required, ANTELLAY Space will apply appropriate consent or privacy mechanisms based on applicable legal requirements.

16. Children's Privacy

ANTELLAY Space does not intentionally use cookies to collect information from children in violation of applicable law.

Our services are not intended to bypass applicable children's privacy requirements.

17. Relationship With Privacy Policy

Information collected through cookies and similar technologies may be subject to our **Privacy Policy**.

The Privacy Policy explains broader practices concerning:

- Personal information;
- Data collection;
- Data use;
- Data sharing;
- Security;
- Retention; and
- User rights.

18. Changes to This Cookie Policy

ANTELLAY Space may update this Cookie Policy from time to time to reflect changes in:

- Technology;
- Website functionality;
- Third-party providers;
- Privacy requirements; or
- Applicable law.

The updated version will be published on this page with a revised “Last Updated” date.

19. Contact

If you have questions about this Cookie Policy or the technologies used by ANTELLAY Space, contact:

ANTELLAY Space

Building the AI Operating System for the Space Economy.

Refund & Cancellation Policy

Last Updated: 15 September 2026

This Refund & Cancellation Policy (“Refund Policy”) applies to paid products and services offered by **ANTELLAY Space**, operated by **ANTELLAY Labs** (“ANTELLAY”, “we”, “us”, or “our”).

This policy should be read together with the applicable **Service Agreement / SaaS Terms, API Terms of Use, Enterprise Terms**, Order Form, Statement of Work (“SOW”), or other applicable commercial agreement.

1. Current Status

ANTELLAY Space is developing its space-technology, AI, data, software, and SpaceOS capabilities.

Certain services, subscriptions, APIs, enterprise products, or other paid offerings may not yet be commercially available.

Where no paid service has been purchased, no refund or cancellation request will generally arise under this policy.

2. Paid Services

When paid services become available, they may include:

- SpaceOS subscriptions;
- SaaS services;
- API access;
- Data services;
- Enterprise software;
- Custom software development;
- Analytics services;
- Technical services;
- Implementation services; and
- Other commercial technology services.

The applicable Order Form or pricing terms will specify the relevant fees and payment conditions.

3. Subscription Cancellation

Where a service is offered as a subscription, the Customer may cancel the subscription according to the cancellation terms stated in the applicable Order Form or service agreement.

Cancellation may take effect:

- At the end of the current billing period; or
- On another date expressly agreed in writing.

Unless otherwise stated in the applicable agreement, cancellation does not automatically create a right to a refund for fees already paid.

4. Refund Eligibility

Refund eligibility depends on the nature of the service and the applicable commercial agreement.

A refund may be considered where:

- ANTELLAY Space materially fails to provide a paid service;
- A duplicate payment was made;
- A payment was processed incorrectly;

- A refund is required by applicable law; or
- A specific written agreement provides for a refund.

5. Non-Refundable Services

Unless otherwise agreed in writing or required by applicable law, certain fees may be non-refundable, including fees for:

- Services already delivered;
- Custom development;
- Implementation;
- Configuration;
- Technical consulting;
- Data processing already performed;
- API usage already consumed;
- Enterprise onboarding; and
- Third-party costs incurred specifically for the Customer.

6. Custom Development Projects

For custom software, AI, data, SpaceOS, integration, research, or development projects, payment and refund terms will generally be defined in the applicable SOW or Order Form.

Advance payments, milestone payments, development costs, third-party expenses, and completed deliverables may be non-refundable where expressly agreed.

7. API Usage

Where API services are billed according to usage, charges may be based on:

- Number of requests;
- Data volume;
- Processing usage;
- Storage;
- Subscription tier; or
- Other agreed metrics.

Fees relating to API usage already consumed are generally not refundable unless otherwise agreed or required by law.

8. Enterprise Services

Enterprise customers are subject to the commercial terms contained in their applicable:

- Master Services Agreement;
- Order Form;
- Statement of Work;
- Service Level Agreement; or
- Other written agreement.

If those documents contain specific refund or termination provisions, those provisions will control.

9. Payment Errors

If you believe that you have been charged incorrectly, please contact ANTELLAY Space promptly.

We may request information necessary to verify:

- Transaction details;
- Account information;
- Invoice information; and
- The reason for the dispute.

Confirmed duplicate or incorrect charges may be refunded where appropriate.

10. Unauthorized Transactions

If you believe a payment was made without authorization, notify ANTELLAY Space as soon as possible.

We may investigate the transaction and may request supporting information.

Where appropriate, the matter may also need to be addressed with the relevant payment provider or financial institution.

11. Service Suspension

ANTELLAY Space may suspend access to paid services where permitted by the applicable agreement, including circumstances involving:

- Non-payment;
- Material breach;
- Security risks;
- Abuse;

- Unauthorized use; or
- Legal requirements.

Suspension does not automatically cancel outstanding payment obligations.

12. Cancellation Due to Breach

ANTELLAY Space may terminate a service or subscription where a customer materially violates applicable contractual terms.

Where termination results from a Customer's breach, fees already paid may not be refundable unless the applicable agreement or law provides otherwise.

13. Cancellation by ANTELLAY Space

ANTELLAY Space may discontinue or terminate a paid service where reasonably necessary due to:

- Business decisions;
- Technology changes;
- Security requirements;
- Legal or regulatory requirements;
- Third-party provider changes;
- Service restructuring; or
- Other circumstances permitted under the applicable agreement.

Where appropriate, customers may receive notice and any refund expressly required under the applicable commercial terms.

14. Free Trials and Promotional Access

If ANTELLAY Space provides:

- Free trials;
- Promotional access;
- Credits;
- Beta access; or
- Complimentary usage,

such access may have separate conditions.

Unless expressly stated otherwise, promotional credits or free access have no cash value and may expire according to the applicable offer.

15. Data After Cancellation

Following cancellation or termination, access to Customer Data may be handled according to the applicable:

- Service Agreement;
- Enterprise Terms;
- Data Processing Agreement; or
- Order Form.

Where applicable, customers may be given a reasonable opportunity to export their data before deletion.

16. Refund Request Process

To request a refund or report a billing issue, contact:

Email: space@antellay.com

Please include:

- Customer or account name;
- Invoice or transaction reference;
- Date of payment;
- Service purchased;
- Amount paid; and
- Reason for the request.

Do not send passwords, API keys, payment-card numbers, or other sensitive credentials by email.

17. Refund Review

Refund requests may be reviewed based on:

- The applicable contract;
- Service usage;
- Payment records;
- Nature of the service;
- Technical circumstances;
- Cancellation timing;
- Applicable law; and
- Any relevant service-level commitments.

A refund decision will be communicated to the requesting customer where appropriate.

18. Refund Processing

Where a refund is approved, it will generally be processed through the original payment method where technically and commercially possible.

Processing times may depend on the payment provider, banking institution, card network, or other payment intermediary.

19. Taxes

Refunds involving taxes will be handled according to applicable tax laws and the nature of the transaction.

Certain transaction fees or third-party charges may not be recoverable where permitted by law and the applicable agreement.

20. Chargebacks

Customers are encouraged to contact ANTELLAY Space before initiating a payment chargeback where the issue can reasonably be resolved directly.

Unauthorized or fraudulent chargebacks may be investigated and may result in suspension of the relevant account where permitted by applicable terms.

Nothing in this section limits any rights available under applicable law.

21. Consumer Rights

Nothing in this Refund Policy is intended to exclude or restrict mandatory consumer or statutory rights that cannot legally be waived.

Where applicable law provides a mandatory refund, cancellation, withdrawal, or replacement right, that legal requirement will apply.

22. Third-Party Services

If a payment, subscription, data service, cloud service, or other component is supplied by a third party, its applicable refund or cancellation conditions may also apply.

ANTELLAY Space will communicate relevant third-party conditions where appropriate.

23. Changes to Pricing

ANTELLAY Space may change pricing for future subscriptions, usage plans, APIs, or services.

Existing customers will be governed by the pricing terms of their applicable commercial agreement unless otherwise provided.

24. Changes to This Policy

ANTELLAY Space may update this Refund & Cancellation Policy to reflect changes in:

- Products;
- Pricing;
- Payment systems;
- Commercial services;
- Legal requirements; or
- Business practices.

The latest version will be published on this page with the updated effective date.

25. Governing Law

This Refund & Cancellation Policy is governed by the laws of **India**, subject to mandatory rights available under applicable law.

Unless otherwise agreed in writing, disputes shall be subject to the jurisdiction of the competent courts in **Jaipur, Rajasthan, India**.

26. Contact

For refunds, cancellations, billing questions, or payment-related matters:

Transparency & Data Sources Policy

Last Updated: 15 September 2026

This Transparency & Data Sources Policy explains how **ANTELLAY Space**, operated by **ANTELLAY Labs** (“ANTELLAY”, “we”, “us”, or “our”), approaches the sourcing, processing, presentation, and use of satellite, orbital, Earth observation, geospatial, space-weather, telemetry, and other technical data used across its technology platforms.

Our objective is to provide greater transparency regarding the origin and nature of information presented through ANTELLAY Space.

1. Our Data Approach

ANTELLAY Space is building technology for the space economy around:

Monitor → Predict → Simulate → Recommend → Operate

Our platforms may combine information from multiple sources and process that information through software, analytical systems, algorithms, AI models, simulations, and data pipelines.

The resulting information may be displayed through websites, dashboards, APIs, SpaceOS, applications, or other interfaces.

2. Types of Data

Depending on the service, ANTELLAY Space may use:

- Satellite data;
- Orbital data;
- Space-object information;
- Earth observation data;
- Geospatial data;
- Space-weather data;
- Telemetry;
- Public technical datasets;
- Scientific datasets;
- Environmental information;
- Third-party API data;
- Customer-provided data;
- Licensed datasets;
- Derived data; and
- Simulated or synthetic data.

3. Data Sources

Data may originate from:

- Publicly available sources;
- Government or institutional sources;
- Scientific and research organizations;
- Satellite-data providers;
- Commercial data providers;
- Third-party APIs;
- Licensed databases;
- Technology partners;
- Customer systems; and
- ANTELLAY-generated systems.

The availability of a dataset through ANTELLAY Space does not necessarily mean that ANTELLAY owns the underlying source data.

4. Third-Party Data

Where ANTELLAY Space uses third-party information, the underlying data may remain subject to the rights, licenses, terms, attribution requirements, and restrictions of the original provider.

Users must comply with applicable restrictions when using or redistributing such information.

5. Live and Near-Real-Time Information

Certain ANTELLAY Space interfaces may display live or near-real-time satellite, orbital, or related information.

Such information may be affected by:

- Transmission delays;
- Processing delays;
- Provider latency;
- Network interruptions;
- Missing observations;
- Data corrections;
- Source-system outages; and
- Other technical factors.

Accordingly, “live” or “near-real-time” should not be interpreted as instantaneous or guaranteed error-free information.

6. Data Processing

ANTELLAY Space may process source information through:

- Data normalization;
- Transformation;
- Filtering;
- Aggregation;
- Classification;
- Geospatial processing;
- Orbital calculations;
- Statistical analysis;
- AI models;
- Machine-learning systems;
- Simulation; and
- Other computational techniques.

Processing may change the format or presentation of the original information.

7. Derived Information

ANTELLAY Space may generate information derived from one or more underlying datasets.

Examples may include:

- Calculated orbital information;
- Risk indicators;
- Analytical scores;
- Predictions;
- Classifications;
- Visualizations;
- Simulations;
- Alerts;
- Forecasts; and
- Other analytical outputs.

Derived information may not represent the exact form of the underlying source data.

8. AI-Generated Information

AI and machine-learning systems may be used to analyze or interpret data.

AI-generated information may include:

- Predictions;
- Recommendations;
- Summaries;
- Pattern detection;
- Anomaly detection;
- Forecasting;
- Classification;
- Risk analysis; and
- Other analytical outputs.

AI-generated results may contain errors or uncertainty and should be independently evaluated before being used for important decisions.

9. Simulated and Synthetic Data

ANTELLAY Space may use simulated or synthetic information for:

- Product development;
- Testing;
- Demonstrations;
- Training;
- Research;
- Software development;
- Model evaluation; and
- Scenario analysis.

Simulated or synthetic data does not necessarily represent actual spacecraft, satellites, missions, or real-world events.

Where practical, such information may be identified as simulated, synthetic, estimated, or otherwise generated.

10. Satellite and Orbital Information

Satellite and orbital information displayed through ANTELLAY Space may include information concerning:

- Orbital position;
- Orbital parameters;
- Space objects;
- Satellite status;
- Pass predictions;
- Conjunction-related information;
- Tracking information; and

- Other orbital characteristics.

Such information may change as new observations or updated source information become available.

11. Earth Observation and Geospatial Data

Earth observation and geospatial information may be obtained from public, institutional, commercial, or other authorized sources.

Image resolution, geographic coverage, update frequency, accuracy, and licensing may vary between datasets.

ANTELLAY Space does not represent that every dataset provides complete or continuous geographic coverage.

12. Space-Weather Data

Space-weather information may include information concerning:

- Solar activity;
- Geomagnetic conditions;
- Radiation;
- Solar-wind conditions;
- Space-environment indicators; and
- Related measurements or forecasts.

Space-weather information may change as new measurements and scientific models become available.

13. Data Accuracy

ANTELLAY Space aims to provide useful and reliable information.

However, no data system can guarantee that all information is:

- Accurate;
- Complete;
- Current;
- Unchanged;
- Error-free; or
- Suitable for every purpose.

Users should validate important information against appropriate authoritative sources.

14. Source Attribution

Where attribution is required by a data provider or applicable license, ANTELLAY Space may identify or credit the relevant source.

Attribution requirements may differ between datasets.

15. Data Licensing

Different datasets may be subject to different licenses.

Some information may be:

- Publicly available;
- Openly licensed;
- Government-provided;
- Research-restricted;
- Commercially licensed; or
- Subject to contractual conditions.

Users must not assume that information displayed through ANTELLAY Space can automatically be copied, resold, or redistributed.

16. Data Availability

Data sources may become unavailable or change without notice due to:

- Provider decisions;
- API changes;
- Licensing changes;
- Technical failures;
- Government or institutional changes;
- Infrastructure outages; or
- Other circumstances outside ANTELLAY's control.

ANTELLAY Space may replace or modify data sources when reasonably necessary.

17. Data Updates

ANTELLAY Space may update datasets and derived information periodically or continuously depending on the relevant service.

Update frequency may vary according to:

- Source availability;
- API limits;
- Processing requirements;
- Data type;
- Subscription level; and
- Technical architecture.

18. Data Retention

Data may be retained for periods appropriate to:

- Providing services;
- Maintaining historical datasets;
- Security;
- Analytics;
- Research;
- Product development;
- Legal compliance; and
- Contractual obligations.

Specific retention terms may apply to customer-provided data.

19. Customer-Provided Data

Enterprise customers may provide their own data to ANTELLAY Space.

The Customer remains responsible for ensuring that it has the necessary rights and permissions to provide such information.

Customer data may be processed according to the applicable commercial agreement and Data Processing Agreement.

20. Data Security

ANTELLAY Space applies reasonable security measures appropriate to the nature of its systems and services.

Security controls may include:

- Authentication;
- Access management;
- Encryption;
- Monitoring;

- Logging;
- Infrastructure protection; and
- Incident-response procedures.

No internet-connected system can be guaranteed to be completely secure.

21. Responsible Use

Users must not use ANTELLAY Space data to facilitate unlawful activities or unauthorized interference with:

- Satellites;
- Spacecraft;
- Ground stations;
- Communication systems;
- Navigation systems;
- Launch infrastructure; or
- Other physical infrastructure.

Use must comply with applicable law and the **Acceptable Use Policy**.

22. Mission-Critical Use

Unless expressly agreed under a separate written contract, ANTELLAY Space data and analytical outputs should not be treated as the sole authoritative source for:

- Spacecraft safety;
- Collision avoidance;
- Launch safety;
- Navigation safety;
- Emergency response;
- Life-critical applications; or
- Other safety-critical operations.

Appropriate independent validation and human oversight should be used.

23. Corrections and Data Issues

If you believe that information presented by ANTELLAY Space contains a significant error, you may contact us.

Please provide:

- The affected page or service;

- Relevant data or identifier;
- Description of the suspected issue; and
- Supporting information where available.

We may investigate and correct information where appropriate.

24. Data Provider Changes

ANTELLAY Space may change, replace, add, or remove data providers as technology, licensing, availability, quality, and business requirements evolve.

Such changes may affect the content, format, availability, or frequency of information displayed through our services.

25. Transparency Regarding Ownership

The presentation or processing of satellite, orbital, Earth observation, geospatial, or other technical data by ANTELLAY Space does not necessarily indicate ownership of the underlying data, satellite, spacecraft, sensor, ground station, or infrastructure.

ANTELLAY Space may operate as a technology, software, analytics, and data-processing layer over information obtained from authorized sources.

26. No Certification by Data Display

Displaying information through ANTELLAY Space does not constitute certification, endorsement, validation, or official authorization by the original data provider unless expressly stated.

Users should consult the relevant authoritative source where official certification or regulatory authority is required.

27. Third-Party Links and Sources

ANTELLAY Space may reference external sources or provide links to third-party websites, datasets, APIs, documentation, or organizations.

Third-party content remains subject to the policies and terms of the respective provider.

28. Changes to This Policy

ANTELLAY Space may update this Transparency & Data Sources Policy as:

- Data sources change;
- New services are introduced;
- Technology develops;
- Licensing requirements change; or
- Applicable laws evolve.

The latest version will be published on this page.
